Profile

Passionate full-stack engineer with 5 years of hands-on experience in developing scalable websites/applications using a wide range of skills such as PHP, Laravel, React JS, Node JS, Express JS, Nest JS. Looking further to learn and enhance existing and new skills.

Education

Jaipur National University

Master of Computer Applications

Dec 2021

Jaipur, Rajasthan

Technical Skills

Languages: PHP, TypeScript, JavaScript

Technologies: Laravel, React.js, Node.js, Nest.js, Express.js, jQuery, Bootstrap, Git, GitHub

Databases: MySQL, PostgreSQL, MongoDB

Experience

Crownstack Technologies

Mar 2024 – Present

Senior Software Engineer

Noida, UP

- * Collaborated with cross-functional teams to plan and execute development roadmaps, directly interacting with clients to gather requirements and ensure successful project delivery.
- * Enhanced system scalability, security, and user experience, and developed comprehensive analytics dashboards to support data-driven decision-making in high-traffic environments.
- * Built and optimized RESTful APIs and scalable database schemas, while continuously upskilling through hands-on projects using Node.js, Express, and Nest.js.

Exiliensoft Consulting Services

Jan 2023 – Mar 2024

Senior Software Engineer

Noida, UP

- * Led the Laravel development team across multiple projects, ensuring best practices, code quality, and efficient delivery.
- * Optimized database design and query performance, implementing efficient data models in MySQL to handle complex hierarchical structures and large-scale data processing.
- * Architected and developed scalable backend solutions, integrating RESTful APIs with frontend technologies like Vue.js and React to ensure seamless cross-platform functionality.

Pebibits Technologies

Sep 2020 – Nov 2022

Associate Software Engineer

Jaipur, Rajasthan

- * Developed and optimized RESTful APIs in Laravel.
- * Gained hands-on experience with React.js by building reusable components, improving frontend skills and enhancing modularity, maintainability, and overall user experience.
- * Participated in Scrum meetings and directly handled client communication, contributing to project planning and execution.

Software Engineer Intern

Jaipur, Rajasthan

- * I learned HTML, CSS, and Bootstrap, enabling me to create responsive web designs.
- * Gained a strong understanding of PHP and Laravel by working on practice projects.
- * Successfully worked on a live project, gaining hands-on experience and enhancing my development skills.

Projects

Texcido Thaut | *PHP, Laravel, Vue.js, Angular*

- * Led backend development for a survey management system with dynamic form creation, multi-level hierarchy, image uploads, location fetching etc using scalable architecture.
- * Implemented intelligent analysis features, including sentiment analysis and scoring systems, and built analytics dashboards to enable actionable, data-driven insights.
- * Made necessary minor adjustments in Vue.js to improve interface responsiveness and usability for both admins and end-users, contributing to a smoother user experience.

HumannConnect | *PHP, Laravel, Node.js, React.js, Sockets.io*

- * Collaborated with cross-functional teams to design scalable backend architectures, create optimized database schemas, define API contracts, and implement robust backend logic ensuring smooth integration between admin and user workflows.
- * Designed and developed dynamic, secure, and scalable RESTful APIs using Laravel.
- * Collaborated with cross-functional teams in an Agile environment, participated in sprint planning and client demos, and contributed to both backend and frontend (React.js) development to deliver high-quality features.

AlfaMenu | *PHP, Laravel, Vue.js, Bootstrap*

- * Refactored and optimized a legacy codebase for a Restaurant Management System, improving code quality, performance, and maintainability across the backend and frontend.
- * Built a comprehensive Restaurant Management System with distinct operational modules for Kitchen and Bar, each equipped with its own POS, streamlining order handling and internal workflows.
- * Independently gathered client requirements and translated them into fully implemented features, ensuring alignment with business needs and delivering end-to-end solutions with minimal supervision.
- * Developed a QR-based customer ordering system, enabling seamless, contactless order placement directly from tables, improving user experience and operational efficiency.
