Education

Hansraj College

Bachelor Of Science in Computer Science – CGPA 8.3/10.0

2021 – 2024

Delhi, India

Experience

Opinium.ai

Software Developer

Sept 2024 – Present

Delhi, India

- Engineered a real-time notification system using Firebase, boosting user engagement by 30% through instant updates.
- Architected and deployed a real-time chat feature with Firebase and WebSocket, increasing user interaction by 30% and minimizing latency.
- Refactored frontend architecture using Context API and dynamic code splitting, cutting load times by 15% and improving scalability.
- Developed robust RESTful API integrations with reusable custom hooks and comprehensive error handling, enhancing data reliability by 25%.
- Integrated Google Calendar API with secure OAuth authentication, enabling efficient scheduling for 100+ users.
- Designed and implemented a RabbitMQ-based message broker service in a microservices architecture, improving system throughput by 20%.
- Automated database schema migrations in Neon PostgreSQL via Python scripts, reducing deployment overhead by 35%.
- Containerized and deployed ML models on Google Cloud Artifact Registry using Docker and Kubernetes, ensuring scalable and automated delivery pipelines.

Projects

Opinium.ai | Nextjs, FastApi, Google Cloud Artifact Registry, Google Cloud Pub-Sub, Web Scraper

Jan 2025

- Developed a social media insights platform where users input URLs, processed via **FastAPI** and **Google Cloud Pub/Sub**, resulting in **30% faster data processing**.
- Scraped Instagram and Twitter data with custom Python techniques, feeding it to **LLM models** for **25% improved sentiment analysis** and engagement insights.
- Deployed AI models on **Google Cloud Artifact Registry** with **Docker**, reducing deployment time by **20%**.
- Displayed insights on an interactive dashboard using **React Chart library**, boosting user engagement by **15%**.

DevCode | NextJs, Firebase

Dec 2024

- Developed a **Code Editor** to practice **HTML**, **CSS**, and **JavaScript**, using **Next.js** for the frontend and **Firebase** for user authentication and project storage.
- Enhanced the user experience with an interactive UI, enabling users to write, save, and revisit their projects, leading to **40% increased engagement** among users.
- Implemented real-time project saving and loading, ensuring users can continue their work seamlessly, resulting in a **30% reduction in load times**.

Technical Skills

Languages: C++, Python, JavaScript, HTML, CSS

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, FastAPI

Databases: MongoDB, PostgreSQL, Firebase Firestore

DevOps & Cloud: Docker, Google Cloud Platform (GCP), Firebase

Tools & Platforms: Git, GitHub, Postman, Figma, VS Code, WebStorm

Achievements

LeetCode – 200+ Questions Solved

- Solved over 200 algorithm and data structure problems on LeetCode, significantly enhancing analytical thinking, coding efficiency, and technical interview preparedness.
