CAREER OBJECTIVE

To pursue a career in an esteemed organization holding a responsible role which would enhance my skills to work in a competitive environment and contribute for the growth of organization and self.

PROFESSIONAL SUMMARY

- Over 3 years of hands-on experience in designing and developing web application.
- Familiarity with front end technologies (HTML 5, CSS, and JavaScript) and JavaScript framework (React).
- Good understanding of database management and query development using MySQL and SQLite.
- Strong knowledge of Django framework and REST API development for creating scalable web application.
- Strong knowledge of Python programming for building efficient and reliable software.
- Familiarity with ORM queries and Object-Oriented Programming.
- Experienced in identifying and resolving software bugs to ensure optimal system performance.
- Hands-on experience in structuring web applications using Django MVT design pattern.
- Familiar with SDLC and Agile Development Methodology.
- Basic understanding of code version tools such as Github able to conduct code reviews.
- Maintained open communication and strong teamwork to support efficient project delivery and workflow coordination.

SKILLS

Programming Languages	: Python
Python Libraries	: Pandas
Web Technologies	: HTML5, CSS3, JavaScript, Ajax
Framework	: Django, Bootstrap
Libraries	: React JS
Database	: MySQL, SQLite
Tools/IDE	: PyCharm, VS Code, GDB Online Compiler

PROJECT DETAILS

Project 1: Dynamic Production Information Attainment and Inspection

Role: Developer

Technologies used: HTML, CSS, JavaScript, Python, Django Framework, SQLite database.

Description:

This application is used to collect data from multiple end users and pass it to the cloud to keep it as safe and secure manner for future usage.

Responsibilities:

- Parallel process execution of data dispatching using Ajax.
- Designing multiple operational webs UI screens as per application requirements.
- Involved in developed software debugging and trouble shooting.
- Use HTTP Protocol to transfer data from the client to the server.
- Completed and delivering the given tasks on time.
- Review and debug code.

Project 2: Web Based Data Management between Client and Server**Role:** Developer**Technologies used:** HTML, CSS, JavaScript, Python, Django Framework, SQLite database.**Description:**

A single platform for tracking progress, managing data, executing, share action items, & keep the team in sync in real time and data is stored for long time where company board add or change their ideas regarding product in future based on data.

Responsibilities:

- Developed dynamic web page using HTML, JavaScript.
- UI designing by implementing Bootstrap and CSS.
- Using Ajax methods for using GET and POST methods.
- Use HTTP Protocol to transfer data from the client to the server.
- Contribute regular meetings.
- Competed and delivering the given tasks on time.

Project 3: Open Center for Creative Solutions**Role:** Developer**Technologies used:** Python, HTML, CSS, JavaScript, Django Framework, SQLite.**Description:**

A secure web platform for authorized users to share ideas, raises concerns, and collaborates on solutions.

Responsibilities:

- Contributed in developing business logic at backend with Python.
- Developed dynamic web pages using HTML5, JavaScript.
