PROFESSIONAL EXPERIENCE

Better Software Software Engineer

03/2023 – 02/2025 | Jaipur, India

- Collaborated with cross-functional teams to develop **user-friendly and efficient frontend UIs**, leading to a **20% improvement** in user onboarding time for key applications.
- Delivered a mobile application within 3 months by designing and optimizing the UI in React Native, which resulted in a **30% reduction in development time** compared to previous projects.
- **Built modular and reusable React components**, reducing development time for new projects by **40%** and enhancing code maintainability.
- Migrated the organization's boilerplate frameworks to Tailwind CSS from BaseWeb, **decreasing frontend load times by 15%**.
- **Designed and implemented CI/CD pipelines** for Android and iOS production using Fastlane, enabling streamlined app deployment and **reducing manual intervention by 50%**.
- Configured cloud infrastructure for web and mobile apps using GitHub Actions, Docker, and DigitalOcean Kubernetes, achieving a **25% increase in deployment efficiency**.
- Integrated Google Lens API into Flask backend for a proof-of-concept feature, demonstrating a 90% success rate in object recognition accuracy for scanned products.
- Resolved server issues and optimized backend infrastructure, improving server uptime by 99.9% and **enhancing backend response times by up to 35%**.
- Engineered robust backend systems and APIs using Flask, **achieving a 25% reduction in response time** for data requests while supporting the integration of five new projects, resulting in improved system efficiency.

PROJECTS

Movie Recommendation System Python

12/2022 – 01/2023

- Built a Python-based recommendation system to suggest movies based on user preferences using the **TMDb (The Movie Database)** dataset that delivered personalized suggestions with **85% accuracy**.
- **Engineered data pipelines with Pandas and NumPy**, reducing the preprocessing time by **40%** through vectorized operations.
- Developed an advanced recommendation engine using **scikit-learn** to calculate similarity scores for over **10,000 movies** based on genre, cast, director attributes and keywords; enhanced user engagement by suggesting relevant content.

Tech Stack: Python, NumPy, Pandas, scikit-learn

SKILLS

Programming Languages: Python, JavaScript

Frontend Technologies: React, React Native, HTML, CSS, Tailwind CSS

Backend Frameworks: Flask, Node.js

DevOps & CI/CD: GitHub Actions, Fastlane, Docker, Kubernetes (DO Kubernetes)

Tools: Git, Postman, VS Code, Jira

Database: MongoDB

EDUCATION

B.Tech (Electronics and Communication Engineering)
Axis Institute of Technology and Management

2019 – 2023

Senior Secondary (XII)
Stepping Stones Intermediate College

2017 – 2019

CERTIFICATES

Virtual Experience Program Participant ✓ — JavaScript | Unit Testing | Python

AWS Machine Learning Foundations 2022 ✓ — Machine Learning | AWS | Software Engineering Practices
