EDUCATION

Delhi Technological University (formaly DCE), Delhi

Bachelor of Technology in Computer Science

CGPA: 9.02

Nov 2020 – May 2024

EXPERIENCE

Oyo rooms

July 2024 – Present

Software Developer Engineer - I

Haryana, Gurugram

- Implemented a fully automated monthly invoice generation and email dispatch system using **Java**, **Spring Boot**, and **Quartz Scheduler**. To ensure high reliability in a distributed environment, configure Quartz to allow only one Kubernetes pod to execute the scheduled task at a time, preventing duplication. This approach reduced operational overhead and stored the response data in **AWS** for future reference and auditability.
- Designed and implemented an early check-in and late checkout feature for a hotel booking platform, allowing guests to personalize their stay times during reservations. We used **Node.js**, **TypeScript**, and **Prisma ORM** for efficient back-end development and seamless database integration. This feature improved the user experience, increased booking flexibility, and achieved **40%** product revenue growth in three months.
- Migrated application infrastructure from GCP VMs to Kubernetes pods, enhancing scalability and deployment efficiency. Configured **Ingress for traffic routing** and **load balance**, and used Docker to containerize applications, reducing the deployment time by **30%**. Developed an automated CI/CD workflow and managed version control through Git and GitHub to streamline the entire deployment process.

Oyo rooms

Jan 2024 – June 2024

Software Developer Intern

Haryana, gurugram

- Migrated test cases from **Enzyme to React/React Native Testing Library**, building a generic, configurable framework to support future enhancements improved test coverage by **70%** across the application while working extensively with **JavaScript**, **React.js**, and React Native.
- Redesigned the OYO OS website UI to deliver a smoother, more consistent user experience while fixing **10–15 high-impact UI** bugs that noticeably boosted performance, responsiveness, and overall usability.

PROJECTS

SocketSecure | [Frontend Github](#) [Backend Github](#)

June 2022 – July 2022

- Developed a real-time chat application using React, **Node.js**, and **Socket.io**, featuring a responsive interface built with Material UI to support seamless, multi-user communication.
- Implemented **AES encryption** to ensure secure messaging and protect sensitive user information, reinforcing data privacy and trust.
- Designed a scalable backend with Express.js and MongoDB, delivering reliable performance and efficient data handling during periods of high user activity.

CodeCommerce | [Frontend Github](#) [Backend Github](#)

April 2023 – June 2023

- Developed a shopping application with an admin dashboard using React, Material UI, and MongoDB, making it easy to manage users and products.
- Built a secure backend with Node.js, adding role-based access for admins and users, and core features like cart, checkout, and payment.
- Integrated **Nodemailer** for automated emails and external APIs for secure, error-free payment processing.

TECHNICAL ACHIEVEMENTS

- Achieved a CodeForces rating of **1457**, ranking in the top **3%** among 65,000+ global participants.
- Achieved a LeetCode rating of **1955**, placing in the top **4%** globally, **earned 20+ badges**, and ranked in the top **1% globally** in 2022 for problem-solving badges.
- Solved **1600+** data structures and Algorithm problems across leading coding platforms.
- Winner of BeagleHacks**, a global hackathon organized by MLH (Major League Hacking).
- Qualified JEE Advanced and ranked in the top **1%** nationwide in India.

TECHNICAL SKILLS

Languages: C++, C, Java, JavaScript, TypeScript, SQL

Frameworks & Database: React.js, Node.js, SpringBoot, PostgreSQL, MYSQL, MongoDB

Devops, Messaging & caching: Docker, Kubernetes, Google Cloud Platform, kubeapps, CI/CD pipeline, kafka, redis

Relevant Coursework: Object-Oriented programming, Computer Network, Database Management System
