Objective

Results-driven Software Engineer with hands-on experience in **Python, Django, SQL**, and **REST APIs**. Skilled in backend development, automation scripting, and cloud-based deployments using AWS. Eager to contribute to scalable web applications and continuously enhance technical proficiency in full-stack environments.

Education

- **Shri Ramdeobaba College of Engineering and Management, Nagpur**
Bachelor of Technology
Electrical Engineering (July 2020-May 2024) **CGPA : 7.26**
- Class 12th (Telangana State Board), **Sri Chetanya Junior Kalasala , Hyderabad** **Percentage: 86.50%**
- Class 10th (CBSE), **Kendriya Vidyalaya New Majri, Kuchana** **Percentage: 59.4%**

Skills

Technical Skills:

- **Python:** Basic knowledge of JavaScript for both frontend and backend development, enabling dynamic, efficient web applications.
- **Django :** Learned to build full-stack web apps with login systems, forms, and database operations.
- **Cloud & Hosting:** AWS EC2 Used to deploy and host Django apps live on cloud servers.

Databases & Data Management:

- **PostgreSQL:** Used for creating and managing databases, writing queries (CRUD, JOINS, filters).
- **SQL:** Proficient in performing Complex Queries, joining Tables, Data aggregation, and Improving query Performance.

Web Development & APIs:

- **Django REST Framework:** Used to create APIs for CRUD operations and connect frontend/mobile apps
- **API Testing:** Familiar with testing APIs using **Postman** to ensure functionality, performance, and reliability.

Internships And Experience

Shubham Flexible Packaging Machine Private limited, Faridabad, Haryana

August 2024 – Present (8 months)

- Designed internal automation tools using Python and Django to streamline R&D processes.
- Developed and managed internal dashboards connected to SQL databases for performance tracking.
- Worked closely with AWS EC2 and S3 for deployment and file management.
- Version-controlled all code with Git Hub and collaborated using Git.

L&T EduTech, Nagpur, Maharashtra, India

January 2024 - April 2024 (4 months)

- Gained real-time industry experience in troubleshooting and engineering services.
- Developed a **Predictive Maintenance System** for Electrical Equipment using **Python**, with a focus on accurately Predicting the Remaining Useful Life of milling machines and incorporating **Regression Algorithms** to model the degradation of machinery over time.
- Gained exposure to industrial data analysis and maintenance strategies for enhanced equipment reliability.

Projects

Harmonics And Mitigation of Harmonics : Here I am working with Goenka Industries for Harmonics Mitigation By Active Filter. Here We Used Power Electronics Switches for instance Rectifier, IGBTs harmonics are very crucial for Power systems and very heavily affect Electrical Infrastructures .We try to mitigate Harmonics at a very cheap price.
