Summary

A dedicated .NET Software Developer with less than a year of experience in MVC web development. Skilled in C#, ASP.NET, and MVC architecture, with a solid understanding of object-oriented programming (OOP). Proficient in front-end technologies (HTML, CSS, JavaScript) and back-end development (SQL Server, Entity Framework). Eager to learn and contribute to the development of scalable, user-friendly applications while collaborating in agile environments.

Education

Bachelor Of Computer Application

December 2021 - June 2024

Guru Govind Singh Indraprastha University

Bachelor Of Computer Application New Delhi, India

CBSE

April 2019 - March 2020

Work experience

Software Developer Trainee

September 2024 - Present

Birdres Technologies pvt. ltd

- Collaborating with the development team to build and maintain the BirdRes project using .NET MVC architecture.
- Assisting in designing and implementing new features and modules within the MVC framework
- Writing clean, efficient, and scalable C# code for both front-end and back-end development.
- Performing unit testing and debugging to ensure application functionality and performance.
- Testing APIs using Postman, ensuring that all endpoints work as expected and meet business requirements.
- Managing and interacting with SQL Server to retrieve and manipulate data for the BirdRes application
- Continuously learning and improving my understanding of .NET technologies, MVC architecture, and API testing practices.
