

AMIT KUMAR

Frontend Developer (React.js | Redux | JavaScript | Performance Optimization)

8512045068 • amitkum3052000@gmail.com • <https://www.linkedin.com/in/amitkumar3052000> • <https://github.com/amitxjangra>
• Gurugram, India • <https://amit-kumar.work>

Summary

3+ years of experience building high-performance web applications with expertise in React.js, Redux, and modern JavaScript. Proven track record in optimizing Lighthouse metrics (FID, LCP), reducing bundle sizes, and strengthening security (XSS, penetration testing). Strong collaborator with experience mentoring junior developers and leading cross-functional projects.

Skills

Frontend: React.js • Redux • JavaScript • Next.js • HTML5 • CSS3 • Tailwind • Styled-Components • Grommet

Testing/Performance: Jest • React Testing Library • Lighthouse • Web Vitals • Lazy Loading • Vite • Babel

DevOps & Tools: AWS • Git • GitHub • Bitbucket • CI/CD Pipelines

Security: XSS Prevention • Penetration Testing • Secure API Integration

Others: Web socket • Google Maps API • DSA • Linux

Key Achievements

 Performance Optimization Reduced Largest Contentful Paint (LCP) from 4s to 1.2s through image optimization and preloading critical resources	 Bundle Size Reduction Cut application build size by 30% via code-splitting and lazy loading, enhancing load times	 Security Enhancements Mitigated 5+ critical vulnerabilities during penetration testing, ensuring compliance with security standards.
 Leadership Mentored 4+ junior developers, conducted code reviews, and improved team productivity by 20%.	 CI/CD & DevOps Managed 10+ repositories (AWS CodeCommit, Bitbucket), automated deployments, and optimized API integrations.	

Experience

Thoughts2Binary Pvt. Ltd.	Gurugram
Software Engineer	05/2022 - 04/2025
- Developed custom React hooks for authentication and API caching, reused across 8+ projects to reduce boilerplate code - Integrated Web Workers for CPU-intensive tasks, preventing UI freezes during large data processing - Cut JavaScript execution time by 35% by eliminating unused dependencies and code splitting - Implemented virtualized lists for data-heavy components, improving scroll performance by 60% - Followed code review guidelines that reduced merge conflicts by 25% - Introduced component documentation in Storybook, decreasing onboarding time for new hires by 40% - Built real-time collaboration features using web socket	

Projects

Worksana	10/2024 - 04/2025
- Upgraded outdated packages, improved security and performance. - Refactored core components for scalability and mentored junior developers.	
Granite	02/2023 - 02/2024
Built and maintained 10+ reusable core components, custom hooks, and helper functions using various JavaScript and React libraries, ensuring flexibility and scalability across multiple projects	
Titan Capital	05/2022 - 02/2023
Developed core modules, built reusable UI components, and streamlined platform data synchronization via plugins
