Summary — Highly skilled Software Developer with expertise in PHP and Laravel framework. Experienced in building, deploying, and maintaining web applications. Proficient in database management, API integrations, and backend development, with a deep understanding of MVC architecture and modern development practices.

Education

SR Institute of Management and Technology Lucknow

Apr 2018 – 2022

Bachelor of Technology

JEELANI Computer Institute Khejuri

Aug 2017 – 2018

Diploma in Computer Application

Skills

Programming Language: PHP, SQL, JavaScript, HTML, CSS

Frameworks And Tools: Laravel, MySQL, JQuery, Bootstrap

Architecture: MVC

Version Control : Git, GitHub

Experience

Mobilise App Lab Private Limited

January 2024 - Present

Software Developer

- Focused primarily on core PHP development, working on backend logic and database integration for various web applications.
- Developed and maintained operations-related functionalities, ensuring smooth and efficient workflows.
- Wrote optimized, secure, and scalable PHP code to handle complex tasks and improve system performance.

Softfix Technologies OPC Private Limited

June 2022 - December 2023

Laravel Developer

- Gained valuable hands-on experience as a web developer in my first company, working with the Laravel framework.
- Developed and maintained web applications using Laravel, enhancing my skills in PHP and backend development.
- Worked on various projects, which allowed me to apply and strengthen my understanding of MVC architecture and database management.

Projects

Inspire Event

- Worked as the Backend Developer for the Inspire Event project, utilizing Laravel to build a robust backend system for event organization and decoration
- Developed and maintained the server-side logic to support multi-role functionalities for various event types, including corporate parties, Kavi Sammelan, and seminars.

MCR Holidays

- Served as the Backend Developer for the MCR Holidays project, utilizing Laravel to build a comprehensive trip planning and hotel booking system
- Integrated Razorpay payment gateway to enable secure and efficient online payments for bookings, ensuring smooth transaction processing.

Cyrix KL

- Contributed as a Junior Developer for the Cyrix KL project, a CMMS (Computerized Maintenance Management System) developed using core PHP to manage hospital healthcare operations
- Assisted in the development and maintenance of the system used for managing hospital assets and tracking complaints related to asset maintenance.

Interests

- Web Development and Frameworks
- Coding Challenges
- Software Architecture and Design Patterns
