

Personal Details

Name: Ankit Kumar

Email: ankitr93217@gmail.com

Mob Number: 8810694153

Address: C-82, Rama Park, Dwarka mor, New Delhi

Pin code: 110075

Objective

Full-stack Developer with 6 years of experience specializing in **PHP (Laravel, Core PHP, CodeIgniter)**, **Node.js (Express JS, Nest JS)**, and database design. Skilled in building robust APIs and scalable web applications. Seeking a challenging role to contribute to backend system architecture and collaborate on cross-functional projects within a growth-focused organization

Skills

- **Languages:** Node JS, PHP, JavaScript, Typescript, Lua, SQL
- **Stack:** MEAN Stack, LAMP Stack
- **Frameworks:** Nest JS, Express JS, Laravel, Angular, CodeIgniter
- **Databases:** Redis, MySQL (Stored Procedures, Trigger, Data Migration), MongoDB, Click house DB, SQL Server
- **ORM:** Eloquent ORM, TypeOrm, Mongoose
- **Queues Package:** Bull MQ, Laravel Queue
- **Authentication Package:** JWT, Passport JS, Laravel Sanctum
- **Api Tools:** Postman, Swagger
- **Other Library/Framework:** jQuery, Angular Material UI, Tailwind CSS, Bootstrap, Data table
- **Other:** Rest Api, Web Services, JSON, XML, Nginx, Unit Testing, Shell Scripting, HTML, CSS, Linux OS(Ubuntu), File Zilla | Dev Ops Tools: Git, Bitbucket, Jira, Docker, Slack

Experience

Organization: Z1Tech

Tenure: 16 May 2024 - 07 May 2025

Profile: Senior PHP Developer

Domain: Advertising

Product 1: PLUNIC

Overview:

The product consists of three main components:

1. Website (WordPress -Based)

The website receives high traffic on its landing pages through various campaigns. On each landing page, the top 4–5 related search keywords are displayed along with relevant content. When a user clicks on one of these keywords, they are redirected to an ad page provided by different partners. Revenue is generated after the second click. An algorithm determines whether to show the top-performing keywords or experimental testing keywords

2. Data Integration System:

To manage data from multiple partners, a custom data integration system has been developed using core PHP with OOP principles. This system collects and processes data from various partner APIs.

3. Performance Monitoring System:

A performance dashboard built with Laravel allows users to monitor the performance of campaigns and keywords across all partners. Users can take data-driven actions based on insights provided by this dashboard.

Technologies Used:

Laravel, PHP, JavaScript, jQuery, Redis, MySQL, Click house DB, Nginx, Openresty, Lua, Shell Scripting, HTML, CSS, Tailwind CSS.

Product 2: XUNO

Overview:

XUNO is a performance-driven affiliate marketing platform that connects publishers and advertisers to optimize traffic monetization, campaign performance, and revenue generation across multiple ad networks.

Technologies Used:

Nest JS, Angular 18, Angular Material UI, Tailwind CSS, TypeOrm, Passport JS, JWT, MySQL etc.

Key Stakeholders:

Publishers:

Website owners and media partners who drive traffic to XUNO landing pages. Their traffic is monetized through smart keyword placement and ad redirection, with earnings based on user engagement.

Advertisers:

Brands, affiliate networks, and ad platforms who bid for user attention and clicks through various campaigns. XUNO helps advertisers reach high-intent users via keyword-targeted content and optimized funnel flows.

Organization: Perfect Ergonomics Systems Pvt Ltd:

Tenure: 16-Jan-2023 - 04-May-2024

Profile: Senior PHP Developer

Domain: Advertising

Product 1: ERP

Client: National Aids Control Organization, a division of the Ministry Of

Health and Family Welfare, Government of India.
