MERN Stack Developer skilled in MongoDB, Express.js, React.js, and Node.js. Expertise in RESTful APIs, JWT authentication, Redux, and Tailwind CSS. Proficient in backend optimization and deployment (AWS, Vercel) with a focus on clean, maintainable code.

SKILLS

JavaScript /ES6+

React.js

Node.js

Context API

REDUX Toolkit

Tailwind CSS

Bootstrap

Express.js

RESTful APIs

MongoDB

Oracle Database

SQL

NoSQL

Responsive Web Designs

JWT Authentication

Git, Github

Functional Skills :

Agile methodology

Continuous

integration

Deployment

Automation

Problem management

Debugging,

Collaborative skill

EDUCATION

Bsc Yashwant College
Nanded -2020-2023
CGPA 7.56

PROFESSIONAL EXPERIENCE

MERN Stack Developer – Tekisky Pvt. Ltd.

July 2023 -Present

- Designed and developed full-stack web applications using MongoDB Express.js, React.js, and Node.js.
- Built and optimized RESTful APIs for seamless communication between front-end and back-end.
- Implemented JWT authentication and role-based access control (RBAC) for secure user authentication.
- Developed reusable React components and managed state using Redux/Context API.
- Integrated third-party APIs for payment gateways, geolocation, and real-time notifications.
- Optimized MongoDB queries and indexing to improve database performance.
- Deployed applications on AWS, Vercel, ensuring scalability and security.

Project :

1. MMH- (Muslim Medical Help) : is an admin-only platform

- designed to manage and coordinate medical aid, doctor approval, and healthcare resources for poor patients. Ensured data security that only authorized admins can login with different access level.
- Verified medical professionals and healthcare centers. Improved app performance, reduced database load
- ensured secured storage of medical documents. Ensured only poor patients receive assistance by cross-checking extracted data with predefined criteria. **Technology Used :**

- React.js, Node.js, MongoDB, Tailwind CSS, google map Api's, Nodemailer, AWS (EC2, S3, Lambda) – For backend hosting and file storage, Github, CI/CD

2. Tekisky Mart : Develop a full-stack E-Commerce platform that offers online shopping with doorstep delivery, ensuring a seamless user experience. **key features :** User Authentication using JWT, Product Management, using CRUD Operations, Cart and checkout Responsive UI, Backend Optimization.
