

Aryan Katiyar

Noida, Uttar Pradesh +91 7024525714 katiyararyan67890@gmail.com [LinkedIn](#)

A passionate and results-oriented Java developer with 2 years of experience building and deploying scalable applications using Spring Boot and AWS. Strong problem-solving skills and a collaborative spirit, eager to contribute to a fast-paced and innovative environment.

Skills

Programming Language: Java

Framework/Tools: Spring Boot, Microservices, Git, Maven

Database: MySQL

Certifications

- AWS Cloud Practitioner certified
- AWS Certified Solution Architect -Associate
- AWS Certified DevOps Professional

Experience

Wipro /Software Developer -

May/2022- Nov/2024 (2.7 years)

Account-Batelco

- Collaborated with cross-functional teams to develop and maintain scalable software applications using Java EE and Spring Framework. I completed a Java assignment, which included 100+ tasks and hands-on experience in Java and bug fixing.

Account: - T-Mobiles Netherlands

- Developed web application using **Spring Boot Restful APIs** for the backend.
- Built demo microservices and deployed using **Docker** and **Jenkins pipelines**
- Participated in internal assessments and self-driven projects simulating enterprise use cases
- Worked independently to design backend services using **Spring Boot**, connected to **MySQL**, and deployed on AWS
- Gained hands-on experience in DevOps tools like Jenkins and Docker through internal lab exercises and real-world demos

Education

Bachelor of Technology /Computer Science:

June/2018- May/22

Sagar Institute of Science and Technology

Project

- **Online Quiz application:** it's a quiz application in which users can create and publish quizzes. Developed quiz application using React for frontend and Spring boot Restful APIs for the backend using a database. Deployed it on AWS with the help of AWS Elastic Beanstalk. Features: Quiz creation, user login, score calculation
- **Deploying an Online Movie Watching Application on the Cloud.** Implemented a global load-balancing solution on AWS to optimize website performance and ensure a seamless user experience for Binge Watch Online global audience using S3, CloudFront, and EC2.
