Software Developer

Education

Guru Gobind Singh Indraprastha University

Graduated July 2022

Bachelor of Technology(B.tech) in Electronics & Communication Engineering (CGPA: 8 / 10)

New Delhi, India

- **Relevant Coursework:** Solid foundation in computer science fundamentals (**Data Structures & Algorithms, DBMS, Operating Systems**) honed my problem-solving skills and understanding of efficient data management, crucial for Software development & involves in conducting various workshops and Coding contests.

Experience

Cavisson Systems Inc — Full stack development

May 2022 – May 2023

Noida, UP

Developed Netforest Dashboard

- Built a comprehensive dashboard application, Netforest, using the **MERN stack** for efficient data visualization and management.
- Designed and implemented a user-friendly and interactive **UI** using **React, Javascript(ES6), HTML5, CSS3**, and , prioritizing a positive user experience through intuitive design and responsive layouts
- Utilized **MongoDB** for flexible and scalable data storage.
- Leveraged **Express.js** to create **robust and secure RESTful APIs** for seamless communication between the **client-side and server-side**.
- Developed a user-friendly and interactive UI using **React** for a positive user experience.
- Invented a versatile solution to handle **multiple projects** simultaneously while maintaining **strong problem-solving skills**.

Revamped Cavisson Internal Website

- Led the migration of the Cavisson internal website from a legacy **React with JavaScript** setup to a modern **MERN Full Stack** architecture.
- Enhanced functionality and maintainability through a **robust Node.js backend**.
- A responsive user interface (UI) for optimal user experience across devices.
- **19% faster load times** compared to industry averages, significantly improving performance.
- Implemented efficient data handling practices in **Node.js** to **ensure data integrity and optimize server performance**.
- Contributed to e-commerce and sales functionality improvements within the platform. Supported marketing efforts by developing tools for campaign management and analytics.

Technical Skills

Languages: C++, Javascript(ES5, ES6), Html5, Css3.

Technologies/Framework: React Js, Redux, React Routers, Node Js, Express Js, JQuery, Bootstrap, **Devops, CICD**.

Tools/Platforms: Git, Github, Webpack, Babel, Aws, Vscode, MySql, Postman, Linux, **Kubernetes, Terraform**

Database: MongoDB(NoSql), MySql.

Projects

GRAMMARLY CLONE | *Html5, Css3, Javascript*

[Link: Click me](#)

- Designed front-end and developed a **real-time grammar and word count checker** using **HTML5, CSS3**, and **JavaScript**.
- Implemented features to capture user input, dynamically display character count, and calculate remaining characters for effective writing within a specific limit.
- Integrated a copy button functionality for seamless transfer of the user's text to other applications.

Interactive Rating Component | *Javascript, Html, Css*

[Link: Click me](#)

- Developed an interactive rating component to gather user feedback using **HTML5, CSS3**, and **JavaScript**.
- Implemented functionality to capture user clicks on star ratings and update the DOM to reflect the chosen rating visually.
- This project honed my skills in user interaction handling and **DOM manipulation**, essential for building dynamic web experience.
