

PROFESSIONAL SUMMARY

Backend Software Engineer with 2+ years of experience building scalable, high-performance applications using Java, Spring Boot, and REST APIs. Skilled in microservices architecture, MongoDB/PostgreSQL, and CI/CD pipelines. Adept at troubleshooting production issues, writing clean, testable code, and delivering features with agility. Passionate about distributed systems, cloud-native development, and backend engineering best practices.

EDUCATION

Maharishi Markandeshwar Deemed To Be University	Ambala, India
Bachelor of Technology in Computer Science: CGPA:9.41	July 2019- June 2023
St. Joseph Secondary School	Butwal, Nepal
+2 Science: GPA:3.87	May 2017-April 2019

SKILLS SUMMARY

- Languages & Frameworks:** Java, Rust, J2EE, Spring Boot, Spring Security, Hibernate, REST APIs, gRPC, Axum, Tokio, Kafka, ActiveMQ
- Databases:** PostgreSQL, MySQL, MSSQL, MongoDB
- Architecture:** Microservices, SOA, API-first design
- CI/CD & DevOps Tools:** Git, GitLab CI, Jenkins, Maven, Docker, Kubernetes
- Cloud & Infra:** AWS (EC2, S3 - beginner), Azure
- Testing and Quality Measure:** JUnit, Mockito, SonarQube
- Other:** System Design, DSA, Code Review, Production Support, Logging & Monitoring

WORK EXPERIENCE

Software Engineer Neurealm (Formerly GS Lab I GAVS),Pune	June 2023 - Present
- Designed and developed RESTful APIs and backend microservices for clients across multiple countries, resulting in a 40% improvement in data processing speed - Implemented dialing rules at the zone level, allowing clients to apply custom rules in any region, increasing operational flexibility. - Resolved customer-reported issues through detailed log analysis and root cause identification, achieving a 95% bug resolution rate. - Implemented a duplicate agent extension check on Agent SDK, enhancing project features and improving the client's recording mechanism. Performed root cause analysis on customer-reported issues through log examination, achieving a 95% bug resolution rate. - Enhanced test coverage using JUnit & Mockito and accelerated delivery timelines by 20% Streamlined development processes, resulting in a 20% reduction in project delivery timelines while maintaining code quality and adherence to industry standard. - Worked on Kafka-based event handling across microservices, ensuring reliable message flows. Collaborated with co-work with teams to enhance the project performance.	
Software Development Intern Suven Consultants	Jan 2023 – May 2023
- Contributed to backend module development using Spring MVC and Java - Supported debugging tasks and learned cloud fundamentals via AWS Labs - Wrote SQL scripts for internal dashboards using Mysql database.	

PROJECTS

Train Booking System (Java, Spring Boot, Spring Security, MongoDB) LINK
- Developed a full-stack backend system for booking and managing train reservations with user and admin roles. - Implemented Spring Security with JWT for secure user authentication and role-based access control. - Built RESTful APIs for core modules like train search, booking, ticket cancellation, and payment simulation. - Integrated MongoDB for flexible and efficient storage of train schedules, user data, and booking history. - Ensured secure and stateless communication using JWT, enhancing session management and scalability. - Applied exception handling and input validation, improving system stability and user experience

CERTIFICATES

Java Programming Beginner to Master (Udemy) CERTIFICATE
Mastered Java fundamentals to advanced concepts, proficiently utilizing control flow, object-oriented programming (OOPS), and data structures. - Acquired expertise in network programming, multithreading, and I/O streams, enhancing performance and efficiency in Java applications.
Learning Spring With Spring Boot(LinkedIn) CERTIFICATE
- Acquired practical knowledge in Spring Boot, including creating and consuming RESTful APIs - Enhanced database management skills using Spring Data JPA and advanced configurations.

ACHIEVEMENTS

- Participated in **Smart India Hackathon 2022**, collaborating on real-world problem statements.
- Solved 250+ Data Structures & Algorithms** problems on **LeetCode**.
- Finalist in internal **coding competitions**, demonstrating **strong problem-solving** and **development speed**.
