Education

Dr. A.P.J. Abdul Kalam Technical University

B. Tech in Computer Science Engineering (CSE)

07/2017 - 08/2021

Gorakhpur, Uttar Pradesh

Experience

SMC Insurance Brokers Pvt Ltd

Software Developer

February 2022 – Current

Noida, Uttar Pradesh

SMC Insurance App | *Javascript, React Native, Redux*

- Created a comprehensive insurance-based mobile application using React Native, featuring products such as health insurance, life insurance, home insurance, pet insurance, professional indemnity, and investment plans.
- Enhanced user experience with visually engaging loading animations that minimized perceived load times and improved overall user satisfaction.
- Implemented a dynamic recommendation engine to track user preferences and automatically display relevant insurance products, significantly boosting user engagement.
- Designed a feature to help users locate network hospitals and cashless garages, ensuring seamless access to medical and repair services, thereby enhancing convenience and simplifying the claims process.
- Built an EMI calculator for quick loan payment estimates.

SMC Insurance Web Application | *Reactjs, Typescript, NextJs, Redux, HTML/CSS*

- Developed a web application using React.js, replicating the React Native app's products for health, life, home, pet insurance, professional indemnity, and investments.
- Employed React's React.lazy and Suspense to dynamically load components, reducing initial load time and improving application performance.
- Managed complex state efficiently using Redux, implementing Redux Thunks for handling asynchronous operations and ensuring data consistency.
- Proficiently integrated RESTful APIs endpoints, managing asynchronous data fetching and updates efficiently, contributing to the application's robustness.

Projects

Movi-e(Movie Web Application)  | *Javascript, React, Redux-toolkit, CSS Modules*

- Developed a dynamic movie search platform, emphasizing modern best practices in component-based architecture and state management.
- Integrated with the TMDB API to seamlessly fetch and display movie and TV show data, leveraging React-Redux for efficient state management and Thunks for handling asynchronous operations.
- Enhanced user experience through lazy-loading of components, ensuring faster load times, and implemented responsive design for optimal performance across devices.

Recipe Searching Web App  | *Javascript, ES6, HTML/CSS*

- Built an integrated recipe search web app utilizing JavaScript for API interactions, data management, and rendering a dynamic user interface, incorporating advanced concepts like asynchronous JavaScript, including promises, async/await, and error handling.
- Leveraged modern web development tools and best practices, including NPM, Parcel, Babel, and ES6 modules, to create a professional-grade application with efficient performance and modular code.

Technical Skills

Languages: HTML/CSS, JavaScript

Developer Tools: VS Code, Android Studio, Postman

Technologies/Frameworks: React.js, Typescript, Next.js React Native, Redux, Git

Certifications

The Complete JavaScript Course

Taught by Jonas Schmedtmann

August 2020 – Current

Udemy
