

# GANESH ERUVARAM

Java Fullstack Developer

**Address** Bengaluru, KA 560049  
**Phone** 9908741110  
**E-mail** eruvaramganeshgr@gmail.com

Adept Software Developer with a proven track record at Sanmoon Software Solutions, where I enhanced system efficiency and client satisfaction through innovative bug fixes, software optimization, and agile methodology. Mastered Javascript and Angular, while fostering team collaboration, leading to significant project advancements and repeat business.

## Work Experience

Over 2+ Years of Full Stack Software Designing , Development and Engineering Experience for Enterprise and Hybrid Mobile platforms.

- Working for **Sanmoon Software Solutions,Bangalore** as **Software Engineer** from June 2023 to till date.
- Working for **Sanmoon Software Solutions, Bangalore** as **Java Fullstack Development Internship** from October 2022 to March 2023

## Education

2020-08 - **Bachelor of Science: Mathematics**  
2023-04 Loyola College - Chennai, India

## Skills

|                     |                        |           |
|---------------------|------------------------|-----------|
| Javascript          | <div><div></div></div> | Very Good |
| Angular             | <div><div></div></div> | Very Good |
| Java                | <div><div></div></div> | Very Good |
| Spring boot         | <div><div></div></div> | Very Good |
| Agile Methodology   | <div><div></div></div> | Excellent |
| Product development | <div><div></div></div> | Very Good |
| Technical Analysis  | <div><div></div></div> | Very Good |

## Technology Exposure

**Languages:** C, Java, Typescript, Javascript  
**J2EE Technologies:** Servlets, JSP

**Web Technologies:** HTML, CSS, Handlebars, Webservice, Websockets

**RDBMS:** Oracle, MySQL, PostgreSQL

**J2EE Frameworks:** Struts, Spring, Spring Boot

**Database Connectivity:** JDBC, JPA, Hibernate

**Unit Testing:** JUnit, Mockito, Karma-jasmine , qunit

**Web Server:** Apache Tomcat Server

**IDE:** Eclipse Juno, IntelliJ, Visual Code

**WEB Ui Frameworks:** JQuery, DOJO, GWT, Angularjs, Angular, Reactjs, VueJs, Emberjs

**Hybrid Development:** Cordova, Ionic, Redux

**NO-SQL:** MongoDB, Couch db

**CLOUD Infra:** AWS, Microsoft Azure, VMWare VCloud, GODADDY, Interserver Cloud VPS

## Languages

Upper intermediate (B2)

## Projects Handled

Contributed on various software product developments by collaborating with marketing, technical and business analysis specialists throughout the product-development process, And combines design, business and engineering skills to create products that meet both market and production requirements. the Major Products detailed below product by product:

## Product Netwitness Endpoint (RSA)

Name: RSA Netwitness Endpoint

Client: RSA Security

Duration: June 2023- Current

Team Size: 25

Role: Software Engineer

### Product summary:

RSA NetWitness Endpoint is an endpoint detection and response solution that employs a combination of live memory analysis, continuous behavioral monitoring, and advanced machine learning to detect known, new, unknown, and non-malware threats that other solutions miss entirely. RSA NetWitness Endpoint helps focus investigations amid thousands of alerts and offers 3X the impact for security teams by considerably reducing attacker dwell time and accelerating threat response.

### Technical Specs:

Frameworks – RSA Launch, Web Services, Sprint boot micro services.

UI Framework - Emberjs

Language - java. Database – Mongo dB

**Responsibilities:**

- Involved Designing and Coding.
- Developing Web pages with Emberjs and Redux.
- Involved integrating Spring boot web services and web sockets.
- Configuring NGINX server for Micro services.
- Developing UI Screens to the UI Wireframes.
- Writing Selector, Reducer, Integration and Unit testing.
- Maintaining staging and release versions.

## Work History

2023-06 -  
Current

### Software Engineer

Sanmoon Software Solutions, Bengaluru, India

- Design and Developed UI Screens for multiple enterprise products with high quality and User Experience
- Identified value opportunities to exploit product for maximum business effectiveness.
- Investigated system issues and implemented resolutions to reduce downtime.
- Guided teams during continuous integration / continuous delivery (CI/CD) processes.
- Supervised architecture, design and implementation of company-wide platforms and applications.
- Defined parameters for API and data acquisitions.
- Led several DevOps teams engaged in software development for enterprise applications.
- Improved systems with addition of new features and infrastructure.
- Enhanced interfaces to promote better functionality for users.

2022-10 -  
2023-03

### Java Full Stack Development Internship

Sanmoon Software Solutions, Bengaluru, India

- Estimated work hours and tracked progress using Scrum methodology
- Designed and developed analytical data structures Improved software efficiency by 10% by troubleshooting and resolving coding issues
- Gained valuable experience working within a specific industry, applying learned concepts directly into relevant work situations.
- Analyzed problems and worked with teams to develop solutions.
- Saved time and resources by identifying and fixing bugs before product deployment
- Created proofs of concept for innovative new solutions
- Expanded client offerings by staying current with industry trends, learning new programming languages, frameworks, and technologies as needed .
- Contributed to a positive team environment by collaborating with fellow interns on group projects and presentations.
