Summary

Software Development Engineer with 20 months of experience building scalable web applications using React, and modern UI libraries. Recently upskilled in backend technologies including Node.js, Strong grasp of data structures, and clean coding principles. Passionate about cross-functional collaboration and delivering user-focused solutions.

Education

Integrated (B-tech +MBA) in Computer science engineering

Lovely Professional University
Jalandhar, Punjab

Skills

- Languages: Javascript(ES6+), TypeScript, Java, C
- Frontend: React.js, Redux Toolkit, HTML, CSS, React prime, Responsive Design
- Backend :Node js, Express.js, Restful API, MongoDB, SQL.
- Concept :Data structure, Testing and Debuging, Optimizations.

Courses

Mern stack Training

masai school

12/2022 – 2023 | Bangalore

Professional Experience

Agilsys software Lab pvt ltd. **oct 2023 -May 2025**

Gisborn Eng --_Workflow Management System

Developed a workflow management system to streamline job and task assignment for engineering operations. Integrated with a third-party job-creation platform to fetch jobs in real-time, manage workflows.

- Integrated third-party API to automatically fetch jobs into the system.
- Implemented a time-tracking module to monitor active task durations in real-time.
- Developed notification module to alert associate managers when tasks are created or updated.
- Built secure REST APIs with Node.js and Express for CRUD operations on jobs, tasks, users, and logs.
- Built a React-based timer that starts when a team member begins a task.
- Enhanced team productivity with real-time tracking and role-based task visibility

kinseed -- Health care

An internal messaging and collaboration platform focused on improving user experience and interface consistency.

- Identified and resolved several UI/UX issues related to layout, responsiveness, and component alignment.
- Added character and word limit restrictions to message inputs, with user-friendly feedback and edge-case handling.
- Performed cross-browser testing and fixed inconsistencies in design and behavior across different viewports.

Projects

Shopingmart (personal project)

- Built a E-Commerce type web app using MongoDB, Express.js, React.js, and Node.js (MERN).
- Handled global state via Redux Toolkit, secured APIs using Axios with credentials, and implemented protected routes with React Router.
- Developed a web application with 10+ dynamic components using HTML5, CSS3, and JavaScript, leveraging React.js for a responsive UI.

TaxGenius (Personal project)

- Developed a web application with 10+ dynamic components using HTML5, CSS3, and JavaScript, leveraging React.js for a responsive UI.
- Tax calculators pages is created according give data.
