EMPLOYMENT HISTORY

AcceronTech Solution Pvt. Ltd – Thane, Maharashtra

July 2023 – Nov 2024

Back-end Developer

Project : Pixocart

Apr 2024 to Present

Team Size : 4

Technologies : Laravel, Postgresql

Web Link : <https://projects.acceron.in/projects/photographer/public/>

"Pixocart" is an innovative platform meticulously engineered to facilitate the seamless hiring of professional photographers, tailored to diverse event needs. This application aggregates a broad spectrum of skilled photographers, each specializing in various event categories—from weddings and corporate gatherings to private celebrations. With its advanced, location-based functionality, Pixocart empowers users to effortlessly connect with proficient photographers in their vicinity, optimizing both convenience and response time. By combining high-caliber photographic expertise with a streamlined, user-centric hiring process, Pixocart redefines accessibility to premium visual services, ensuring each event is captured with exceptional precision and artistry.

Back-end Developer

Dec 2023 to Aug 2024

Project : Manoeuvre

Team Size : 3

Technologies : Laravel, MySQL

Web Link : <https://mano.manoeuvreedu.com/>

Manoeuvre is an advanced educational platform designed to enhance learning experiences for students. It allows users to log in, purchase courses, access study materials, attend live lectures, and view recorded videos. The platform features a batchwise system where faculty members are assigned to specific groups, ensuring personalized mentorship and direct interactions with students. This structure promotes tailored guidance and academic excellence. By integrating various educational tools, Manoeuvre creates an interactive and seamless ecosystem that supports learners throughout their educational journey. It is a comprehensive solution aimed at enriching the learning process and fostering student success.

Aeologic Technologies – Noida, Uttar Pradesh

Feb 2022 – July 2023

Full-stack Developer

Project : Maandhan

Mar 2022 to Nov 2022

Team Size : 8

Technologies : Angular JS, Node JS, Postgresql

Web Link : <https://maandhan.in/>

Maandhan is a government-backed initiative aimed at uplifting economically disadvantaged individuals by facilitating a structured savings program. Under this scheme, enrolled users contribute a modest amount to government-sponsored accounts, with additional contributions from the government. The program spans a fixed duration of 60 years, after which users receive their accumulated funds. In cases where a user passes away before completion, the nominee designated by the user is entrusted with continuing the contributions to ensure program benefits are realized. Maandhan serves as a critical financial support mechanism, fostering economic resilience and enhancing the quality of life for underserved populations by promoting long-term financial stability and security.

Full-stack Developer

Nov 2022 to Jun 2022

Project : Seeds

Team Size : 5

Technologies : Angular JS, Node JS, Postgresql

Web Link : <http://seed.aeologic.in/>

A seed management system can help with the administration, management, and security of seeds: Seed administration. A seed management system can help with the online registration of seed growers, seed producing agencies, and seed processing plants.
