SUMMARY

Backend Developer specializing in PHP, Laravel, and MySQL, with growing expertise in Python/Django. Proven success in:

- Building scalable event-tech platforms handling **10K+** registrations
- Automating workflows for a **70% efficiency gain**
- Integrating payment gateways for **seamless transactions**

SKILLS

- Backend Development:** PHP, Laravel, Django (Learning)
- Databases:** MySQL, MongoDB (Familiarity)
- Frontend Technologies:** HTML, CSS, JavaScript, Bootstrap (Working Knowledge)
- Cloud Platforms:** Google Cloud Platform (GCP)
- Architecture Patterns:** MVC (ASP.NET Core, Laravel)
- APIs & Integrations:** REST APIs, Payment Gateway Integration

EXPERIENCE

Software Developer

SCI Knowledge Interlinks

January 2024 - Present, Pune

- Developed and optimized the **Exhibitor Portal**, enabling **3K+** exhibitors to manage profiles, invite delegates, and access event resources, improving user engagement.
- Designed and implemented a **role-based access control (RBAC) Admin Panel**, streamlining internal management of exhibitor data and reducing administrative overhead by **50%**.
- Automated backend processes for data synchronization, reducing manual updates by **70%** and increasing accuracy across event systems.
- Integrated **multi-gateway payment APIs** (Razorpay, CCAvenue, PayPal, PayU), ensuring a **99%** transaction success rate for event registrations and purchases.
- Built RESTful APIs for real-time data exchange between the Exhibitor Portal and third-party systems, improving interoperability and reducing error rates by **40%**.
- Collaborated with clients to deliver customized backend solutions for large-scale events, including **Startup Mahakumbh**, **TiE Global Summit**, and **Bengaluru Tech Summit**.

Jr. Software Engineer - Trainee

iRely Soft Services Pvt Ltd

August 2023 - September 2023

- Built an MVVM-based Movie Rental System with Sencha ExtJS & ASP.NET Core, cutting feature rollout time by **30%**.
- Optimized SQL Server schema and queries to improve performance and guarantee data integrity.
- Integrated ASP.NET Core Identity for secure authentication and role-based authorization.

PROJECT

Blog Management System (Django, MySQL)

- Built a blogging platform where users could register, post blogs, and comment on others' posts.
- Developed secure user authentication using Django's built-in authentication system with login, registration, and password reset features.
- Integrated a comment system with moderation to ensure content quality and prevent spam.
- Utilized Django ORM to efficiently handle dynamic queries and database transactions, ensuring smooth data handling.
- Designed the system with RESTful principles for potential future API expansion.

EDUCATION

Bachelor of Engineering, Computer Science

Visvesvaraya Technological University · Bangalore · 2023 · 7.9 CGPA
