SUMMARY

Software Developer with expertise in **React, TypeScript, Node.js, Redux, Context API, Generative AI, HTML, and CSS**, offering over **1 year of experience** in modern web design and development. Demonstrated success in building performant, scalable applications using **Tailwind CSS, Node.js, and AWS**. Actively engages with the developer community and professional networks to stay ahead in the evolving tech landscape.

EXPERIENCE

Software Developer

Dec '23 — Nov '24

Frontease

Indore, India (Remote)

- Built 5+ scalable React/Next.js web apps, optimizing lazy loading and SSR to improve load speed by 40%.
- Revamped company website UI/UX, increasing site traffic by 30% and lowering bounce rate by 25%.
- Delivered 3+ tools for clients, automating workflows and reducing manual work by over 50%.
- Led UI library development, reducing design inconsistencies and speeding up dev time by 35%.
- Created 20+ reusable components with Tailwind, Radix UI, and Storybook across multiple apps.
- Set up CI/CD with GitHub Actions, cutting deployment time by 30% and reducing build errors.

EDUCATION

MS in Computer Science, Scaler Academy (GPA: 9)

Jun '23 — Present

Indore, India

- Pursuing an intensive program covering Data Structures, Algorithms, and System Design. Mentored by industry experts to design efficient, real-world software solutions through DSA and system design practice.

BE in Electronics and Telecommunication, IET-DAVV, Indore (GPA: 6)

Jun '17 — Jan '22

Indore, India

- Completed a foundational program in ECE with expertise in Digital/Analog Circuits, Communication Systems, Signal Processing and Microprocessors through hands-on projects and lab work. Enhanced technical proficiency via academic coursework and practical applications.

AWARDS

Cross-Functional Collaboration Success

Aug '24

Frontease

Collaborated with PMs, designers & backend to launch full-stack features bug-free on time.

Best UI/UX Implementation – Internal Hackathon

Nov '24

Frontease

Secured 1st place among teams for building a seamless user interface with Next.js and Tailwind CSS.

PROJECTS

LoftOS UI, Frontease [Link](#)

Dec '23 — Jul '24

- Engineered 20+ responsive UI components using Radix UI and Tailwind CSS for interactive interfaces.
- Implemented reusable elements like carousels, popovers, and modals used across 5+ active projects.
- Delivered clean, accessible UIs that improved user experience score by over 30%.
- Integrated Storybook for visual testing and faster design iteration with designers.

Media Streaming Platform [Link](#)

Sep '24 — Oct '24

- Developed a Netflix clone using Next.js, Tailwind CSS, and the TMDB API, featuring 100% mobile responsiveness.
- Implemented trailer modals, adaptive hero banners, and dynamic carousels for UX enhancement.
- Built mobile-first layout ensuring 100% responsiveness across iOS, Android, and desktop.

SKILLS

Programming Languages TypeScript, JavaScript, ES6

Frameworks and Libraries React.js, Next.js, Redux / Context API, Node.js, Express

Web Development HTML5, CSS3, Tailwind CSS, Responsive Web Design, Server-Side Rendering, Git, GitHub

Database and API SQL, MongoDB, REST API Design, API Integration

Software Development Practices Agile/Scrum Methodologies, Technical Communication, Team Collaboration, Clean Architecture, Scalable Web Applications, Version Control Systems
