SUMMARY

Software developer with more than 2 years of experience in **JavaScript**, **React.js**. Expertise in **performance optimization**, **UI/UX design**, and **scalable solutions**. Skilled in **RESTful APIs**, **React-Redux**, and **Git**. Committed to driving **innovation** and **growth** in fast-paced environments

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS, AJAX, jQuery,

State Management: Redux, Context API

Backend & APIs: Django, Python, RESTful APIs, MySQL, Postman

Version Control & Deployment: Git, GitHub, GitHub Actions (CI/CD)

UI/UX: Responsive Design, Core Web Vitals, Accessibility, Cross-Browser Compatibility

Testing: React Testing Library, Test-Driven Development (TDD)

WORK EXPERIENCE

Software Engineer Analyst | Accenture | Gurugram

Jan 2023 - Present

- Troubleshoot and debugged over 100 issues, leading to 30% reduction in recurring defects and enhanced cross-project stability.
- Collaborated with 4+ cross-functional teams (QA, Testing, Implementation) at all times to ensure high-quality releases with 95% defect-free deployments. Performed troubleshooting and debugging in fast-paced environment.
- Contributed to the software development lifecycle by designing and enhancing reusable UI templates, applying structured problem-solving techniques and performance optimizations.
- Focused on user experience (UX) and interface design, contributing to the overall improvement of front-end elements to enhance business workflows and reducing user complaints by 40%.
- Regularly collaborated with QA and product teams to align on expected behaviors and edge cases.

GenC Intern | Cognizant Technical Solution | NOIDA

Jan 2022 - July 2022

- Gained proficiency in JavaScript, HTML, CSS, and SQL, significantly enhancing front-end development and database management skills.
- Developed and executed 50+ comprehensive test cases, enhancing expertise in testing methodologies and quality assurance practices, while improving performance and reducing the failure rate by 25%.
- Collaborated on a team project to test and improve the login functionality of an application, ensuring robust performance by 20% and a user-centric design, and demonstrating leadership in a cross-functional setting.

EDUCATION

Bachelor of technology in Information Technology from Chandigarh Engineering college, Punjab

2018-2022

PROJECTS EXPERIENCE

FoodClub

React.js, Tailwind CSS, React-Redux, CI/CD, Git

- **Developed** a high-performance food delivery web application using **React.js**, **Tailwind CSS**, and **React-Redux** for state management, ensuring **optimized UI** and **scalable architecture**.
- **Implemented** advanced performance features including **lazy loading**, **code chunking**, and **custom hooks**, resulting in a **45%** improvement in load times and a smoother user experience.
- Implemented **CI/CD pipelines** with **GitHub Actions** and **Git**, ensuring 100% successful deployments; used **React Testing Library** for reliable, efficient testing.
- Reduced API load times by optimizing frontend request logic and debouncing frequent calls.
- Implemented structured data handling using JSON and XML formats, enabling seamless **API integration** with **RESTful** services.

ShopVista

Django, HTML, Bootstrap, jQuery, SQLite, RESTful APIs, Git

- **Developed** an e-commerce website using **Django**, **HTML**, **Bootstrap**, and **jQuery**, focusing on a **user-friendly interface** and **responsive design**. For version code system utilised **GIT**.
- Enhanced data flow between frontend and backend by integrating **RESTful APIs** and optimizing **SQLite** for efficient **data management**, improving system performance by **35%**.
