Summary

With over two years of professional experience, I specialize in developing applications using React, delivering efficient and user-friendly solutions.

Education

- B.Tech– JNT University, Kakinada

Technical Skills

- Web/Internet Technologies: HTML, CSS, Bootstrap, JavaScript, React JS, Redux
- Source Management: Bitbucket, Sourcetree
- Tools/IDEs: Visual Studio Code
- Operating Systems: Windows

Experience

React Js Developer, Suri Information Services Visakhapatnam (Feb 2023- Current)

Project: Teamanics

Environment: React JS, Visual Studio Code.

Responsibilities

- As a React developer, I contributed to the development of a skill-based SaaS hiring platform, focusing on both candidate and enterprise web applications.
- I assisted in constructing and delivering various modules, including Authentication, Authorization, Profile Management, Peer Rating Management, Skills Management, and Recruitment Workflow.
- Developed and optimized React components using Hooks (useState, useEffect, useContext, useMemo, useCallback) to improve performance.
- Integrated React Router for seamless navigation between candidate and enterprise modules.
- Implemented state management using Redux for handling authentication, profile management, and recruitment workflows.
- Fetched and managed Restful APIs using Axios, improving API response handling with error boundaries and retry logic.
- Collaborated with backend developers to define API contracts and optimize request - response cycles leading to reduced API latency and improved data consistency.

Project: Tofolo

Environment: React JS, Visual Studio Code.

Responsibilities

- Contributed to the development of the Customer and Partner Management Module, improving user interactions and engagement.
- Implemented Coupon Management, enabling dynamic coupon generation, validation and redemption tracking.
- Developed Rewards Management, displaying personalized rewards for both customers and service providers.
- Enhanced UI/UX design by optimizing the responsiveness and performance by key features.
- Integrated RESTful APIs to fetch, update and manage rewards data, ensuring a seamless user experience.
- Conducted performance optimizations using React.memo and lazy loading to reduce the unnecessary re-renders and improve efficiency.
- Debugged and resolved critical UI issues, ensuring smooth navigation and interaction.
