Summary

Software Developer with over 3 years of experience at Siemens EDA and Samsung R&D. Skilled in writing and maintaining code in Java (Java 8/11) for backend and microservice architectures. With a solid technical background from IIT Delhi, I deliver reliable APIs, perform performance tuning and automated testing, and collaborate effectively with cross-functional teams.

Experience

Siemens EDA

February 2024 – Present

Software Engineer

Noida, India

- Built Java microservices for the Veloce TBX fault-detection application, improving request throughput by 75%.
- Developed a ranking feature in Spring Boot that cut error-investigation time by 30% and secured a \$10 M client deal.
- Automated build, test, and deployment using Maven, Jenkins, Docker, and Kubernetes, shortening release cycles from 48 hrs to 4 hrs.

Samsung R&D Institute

June 2022 – January 2024

Software Engineer

Bangalore, India

- Implemented and tuned Java backend modules for the 5G NR beam-management stack, boosting performance by 25%.
- Scaled event-processing services to handle 2 M transactions/day (50% growth) via asynchronous messaging.
- Improved service uptime to 99.9% through enhanced monitoring and fall-back mechanisms.

WETFF Solutions

May 2021 – July 2021

Intern – Full Stack & Blockchain Developer

India

- Built a decentralized document management system (DApp) using Python's Brownie framework and Solidity, ensuring high network uptime.
- Developed smart contracts and integrated blockchain components with backend systems to improve data retrieval and scalability.

WOBB (Influencer Marketing Platform)

December 2019 – January 2020

Intern – ML Research Intern

India

- Implemented a machine learning model using GAN techniques in Python, optimizing data pipelines and enhancing model performance.
- Collaborated with research teams to fine-tune model parameters and improve overall stability.

Skills

Java (8/11), Spring Boot, Hibernate, RESTful APIs, Microservices, Maven, Gradle, C, C++ (C++14/17, STL), Python, Docker, Kubernetes, Jenkins CI/CD, Git, SQL (MySQL, PostgreSQL), NoSQL (MongoDB), Linux, Multithreading & Concurrency, Performance Tuning, Automated Testing (JUnit, Mockito), Agile & Scrum methodologies, Logging & Monitoring (ELK, Prometheus)
