

MOHIT KUMAR GARKOTI, FULL STACK DEVELOPER

(+91) 83928 65130 | mohitgarkoti12345@gmail.com | [Github](#) | Champawat, Uttarakhand, India

Professional Summary

- Accomplished Full Stack Developer with 3 years of hands-on experience in building scalable and efficient web applications.
- Proficient in NodeJS, ExpressJS, ReactJS, and MySQL.
- Proven expertise in the insurance domain, having successfully developed and optimized critical systems like loan against securities platforms and digital KYC solutions.
- Focused on enhancing operational efficiency and ensuring compliance through robust application development.
- Enthusiastic about leveraging cutting-edge technologies and fostering collaborative environments for impactful project delivery.

Projects

1. Loan Against Securities – Backend API Development Dec 2024 - Present

Tech Stack: Node.js, Express.js, MongoDB, AWS S3, REST APIs, JWT Authentication, Postman, Git

- Developed secure and scalable RESTful APIs to power a Loan Against Securities (LAS) platform for mutual funds and shares.
- Implemented customer onboarding modules, including document upload, validation, and eligibility checks.
- Integrated with multiple third-party APIs for real-time verification and data fetching.
- Designed loan disbursement workflows and ensured seamless execution of backend processes.
- Applied industry-standard encryption techniques to ensure data privacy and secure communication.
- Built role-based access control mechanisms to manage internal user permissions and operations.
- Utilized AWS S3 for secure document storage and retrieval.
- Used Postman for comprehensive API testing and Git for source code version control.

2. Digital KYC & Loan Assignment System May 2024 - Present

Tech Stack: Node.js, Express.js, REST APIs, MongoDB, AWS S3, JWT, Third-Party APIs

- Developed a fully digital KYC system to facilitate loan processing against insurance policies through a 100% paperless workflow.
- Integrated with third-party APIs for PAN verification, Aadhaar authentication, and video KYC to enable real-time identity validation.
- Designed and implemented a policy verification flow to ensure eligibility before initiating loan assignment.
- Created an assignment module to generate, manage, and store legally required loan documents.
- Ensured secure handling of sensitive user data using robust encryption techniques and secure API design.
- Streamlined the customer journey from onboarding to disbursement, enhancing usability for both agents and end users.
- Enabled real-time validation and status tracking for KYC and loan processes, improving operational efficiency.
- Used AWS S3 for secure document storage and JWT for authenticated user sessions.

3. E-Learning Platform Jun 2023 – Apr 2024

Tech Stack: React, Node.js, Express.js, MySQL, Bootstrap, Instamojo, JWT

- Developed a full-stack online learning platform to offer courses with secure user registration and authentication.
- Implemented course management features including course creation, enrollment, and progress tracking.
- Integrated **Instamojo** payment gateway for seamless and secure payment processing.
- Designed a responsive and intuitive frontend using **React** and **Bootstrap** for enhanced user experience.
- Built a scalable backend with **Node.js** and **Express.js**, supporting efficient data flow and business logic.
- Utilized **MySQL** for structured storage and retrieval of user, course, and progress data.
- Applied **JWT-based authentication** to ensure secure access and session management for users.

- Focused on performance optimization and scalability to support future platform growth.

Work Experience

Full Stack Developer, VALUENABLE PVT LTD, MUMBAI

July 2022 – Present

- Developed and maintained scalable web applications using Node.js, Express.js, React.js, and MySQL, ensuring high performance and maintainability.
- Designed and integrated RESTful APIs to enable seamless communication between frontend and backend systems, with thorough testing using Postman.
- Built an OCR system using AWS Textract and Amazon Bedrock to extract data from PAN, Aadhaar, and insurance documents, enhancing automation in the KYC process.
- Developed a secure, paperless digital KYC system for loan processing against insurance policies by integrating third-party APIs (PAN, Aadhaar, Video KYC).
- Utilized AWS S3 for secure document storage, EC2 for scalable application deployment, and Lambda for event-driven, serverless processing.
- Optimized backend performance through code refactoring and SQL query tuning, reducing load times by up to 10x.
- Participated in code reviews, followed best practices, and ensured high-quality, maintainable code.
- Contributed across the full software development lifecycle, including requirement gathering, development, deployment, and ongoing support.
- Resolved complex production issues, improving system reliability and reducing downtime.
- Collaborated with cross-functional teams (QA, product, design) to implement new features and enhance user experience.
- Integrated various third-party services to support real-time data validation, payment processing, and document management.
- Actively participated in sprint planning, reviews, and technical discussions to drive product improvements.

Skills

1. Technical Skills

- **Programming Languages:** JavaScript, Python.
- **Front-End:** ReactJS, HTML5, CSS3, Bootstrap 4, Angular, Tailwind CSS, Redux, jQuery, TypeScript
- **Back-End:** Node.js, Express.js.
- **Databases:** MySQL, MongoDB.
- **Version Control:** Git.
- **Tools:** VS Code, Postman.
- **Other:** RESTful APIs, JSON, ChatGPT, Docker, AWS, Jenkins

2. Soft Skills

- Communication – Written and Verbal.
- Leadership – Team Management
- Problem Solving – R&D and Analytical skills.

Education

Diploma In Information Technology - Uttarakhand Board of Technical Education **Aug 2019 – Jun 2022**
