KEY PROJECTS

Medicine Application 4 Team Size

March 2024 - Present

- Developed an Online Medicine App using React.js and Node.js.
- Enabled users to search for medicines, add them to their cart, and view detailed information about each medicine.
- The application supports both Admin and User roles for varied functionality.
- Admin can manage the inventory, while Users can search, browse, and purchase medicines.
- Implemented responsive design for optimal viewing across devices.

Dental Application 2 Team Size

November 2023 - March 2024

- Developed a user-friendly Dental Application using React.js.
- Enabled users to manage appointments, browse dental services, and access oral health information.
- Ensured a responsive design for optimal viewing across various devices.
- Implemented an intuitive navigation system for easy access to key features.
- Designed custom styling to enhance the overall user experience.

Dream Home 1 Team Size

- Developed DreamHome , a web application for buying and selling homes, leveraging React.js for a dynamic and responsive user experience.
