SUMMARY

To leverage my backend and frontend development skills and experience in a challenging environment. Experienced in designing, developing, and implementing web applications using Magento 2, Django, React.js, and Next.js. Proven ability to deliver high-quality solutions and collaborate effectively in team settings.

EXPERIENCE

Magento 2 Backend Developer

Nihilent Ltd

📅 2023 – Present

📍 Pune, India

- Developed the Curator Module to empower the art curation team with tools to manage and showcase high-quality artworks, leading to the addition of 100+ unique artworks on the platform.
- Built a Re-Ranking Module to classify artworks based on quality levels, ensuring top-rated items appear on the homepage, enhancing visibility and user engagement.
- Implemented automated cron jobs, including:
 - Identifying and highlighting “Artist of the Month” based on artwork views.
 - Sending automated emails to artists regarding policy updates in business logic.
- Designed and customized the price calculation engine to reflect complex business logic during checkout and artwork pricing.
- Created Bill of Supply and Tax Invoice generation features for better compliance and finance automation.
- Integrated and managed email notification flows across the entire order placement journey — notifying artists, admins, curators, and the finance team as per order events.
- Handled end-to-end debugging, resolved backend issues, and optimized performance.
- Performed unit testing to ensure reliability and maintainability of modules.
- Collaborated closely with frontend, UI/UX, and QA teams during Agile sprint cycles to align backend services with business requirements.
- Tech Stack: Magento 2, PHP, MySQL, GitLab, Postman, Cron, XAMPP, Redis, Linux

Backend Developer (Django)

Nihilent Ltd – nSepia: Mental Health App

📅 2024 – Present

📍 Pune, India

- Conducted in-depth research and analysis of top mental health apps to gather insights on industry trends and identify features for implementation, improving user engagement and app relevance.

TECHNICAL SKILLS

- **Programming Languages:** Python, PHP, JavaScript, React Js
- **Frameworks:** Django, Magento 2, Next.js
- **Tools:** Postman, Git, GitLab, Linux, PostgreSQL, Vs Code, Docker, Mysql
- **Methodologies:** Agile, Scrum

EDUCATION

Bachelor of Technology in Computer Science

DIT University

📅 2023

📍 Dehradun

CGPA: 8.07

CERTIFICATIONS

- HTML, CSS and Js for web developers (Coursera)
- Mysql Bootcamp (LCO)
- CPP(LCO)
- Data Analysis with R Programming (Coursera)

PUBLICATIONS

Mobile Sensing Based Classification System for Human Fall Detection

IEEE

- Integrated the app with a third-party emotion analysis API, enabling real-time emotional feedback based on user expressions and responses.
- Designed and implemented business logic for:
 - User subscriptions (start/end cycles, renewal logic)
 - User data handling (onboarding, preferences, emotion tracking)
- Developed and optimized PostgreSQL queries and designed relational models for structured data flow.
- Created REST APIs to support the entire onboarding flow, capturing key user info like mood, habits, and preferences to personalize content.
- Integrated the app with SMTP email servers to enable timely email notifications for user signups, policy changes, and onboarding reminders.
- Developed the user interface using React.js and Next.js, including server-side and client-side rendering.
- Implemented site performance optimizations, including pagination.
- Integrated NLP search functionality for enhanced search capabilities.
- Collaborated closely with the frontend and product teams to ensure seamless integration and functional delivery.
- Tech Stack: Django, Python, PostgreSQL, REST API, SMTP, Git-Lab, Linux, React.js, Next.js

Web Developer and Design Intern

The Sparks Foundation

📅 Remote

📍 Remote

- Developed a donation website integrated with Razorpay payment gateway.
- Employed HTML, CSS, and JavaScript for front-end development.

PROJECTS

Artoreal

E-commerce Website

📅 Aug 2023 - present

📍 Pune, India

- Developed both frontend and backend of an e-commerce website for artworks.
- Backend responsibilities included creating the curator module, implementing a re-ranking module to highlight top artworks (100+ artworks), developed price calculation logic, and created invoice generation functionality for artists.
- Also developed a module for dynamically changing the banner image on the website's homepage.
- Frontend work focused on site performance optimizations, including pagination and SEO, and developing the UI for various pages.

Fall Detection System

IOT and Machine Learning Project

📅 Jan 2023-April 2023

📍 Dehradun

- Collected raw data from iPhone sensors using IOT methodologies for human fall detection.
 - Collected a dataset of approximately 30k entries.
 - Analyzed the collected data using machine learning models, including ANN and KNN.
 - Achieved a fall detection accuracy of 99%.
-

Nsepia App Enhancement

Mental Health App

📅 Nov 2024 - present

📍 Pune, India

- Analyzed competitor mental health apps to identify unique features for implementation.
- Developed the subscription module, including business logic for different subscription plans.
- Implemented SMTP functionality for sending emails.
- Built admin functionality for efficient management of users and admin roles, including configurations and subscription plan management.
