Professional Summary

Software Developer with over **2 years of hands-on experience** in Frontend and Full Stack development, skilled in building high performance web applications. Have strong expertise in **React.js, JavaScript, TypeScript, Redux, HTML, CSS, Bootstrap**, and **Git** for **Frontend**. Moreover, I have a solid grasp of **Backend technologies** including **Node.js, Express.js**, and **MongoDB**.

Skills

Language	: JavaScript, Typescript, Java
Framework	: React.js, Redux, Node.js, Express.js
Markup Language	: HTML5, CSS3, Bootstrap, Tailwind CSS, SASS, Material UI
Database	: MongoDB

Experience

Tech Oceanic Technologies Full Stack Developer	December 2022 – Present
• Led the development of the project single-handedly, managing both frontend and API integrations to ensure smooth functionality. • Collaborated with backend developers to define API structures and improve request-response efficiency. • Improved accessibility by optimizing color contrast, and refining interactive elements for a more user-friendly and inclusive experience. • Optimized a scalable frontend using React.js and Redux Toolkit, improving state management and reducing unnecessary re-renders. • Integrated and optimized API communication with Axios, handling JWT authentication tokens, request retries, and efficient data fetching. • Implemented internationalization (i18n) with dynamic locale switching, enabling seamless multilingual support (English/French). • Implemented robust error handling and toast notifications, improving user experience with clear feedback on API failures. • Developed dynamic, responsive UI with React.js and TypeScript, ensuring cross-browser compatibility and seamless user experience. • Designed backend APIs using Node.js/Express, with secure JWT authentication and optimized database operations in MongoDB. • Implemented virtualization in React.js to efficiently render thousands of items in lists, enhancing performance in data-heavy applications • Enhanced performance with lazy loading, code splitting, and robust error handling for faster and smoother user experiences. • Conducted testing and debugging to deliver reliable, high-performing applications.	

Internship and Certifications

Newton School Full Stack Web Development	January 2022 – September 2022
• Technical Stack Learnt: HTML, CSS, JavaScript, React.js, Redux, Node.js, Express.js, MongoDB, Java. • Worked on various full stack projects. • Participated in various coding competitions held by Newton School.	

Education

Bachelors from University of Delhi.	April 2018 – October 2021
-------------------------------------	---------------------------

Projects

Errandia | Tech Oceanic Technologies

January 2025 – present

Developed a platform to streamline errand services, enhancing user convenience through intuitive UI and efficient data management.

Responsibilities:

- Built a responsive, bilingual web application using React.js and Bootstrap, ensuring seamless navigation in English and French.
- Implemented Redux-based global state management to handle authentication, language preferences, and user data.
- Integrated REST APIs with Axios, handling authentication tokens securely and optimizing API request performance.
- Designed reusable UI components to enhance maintainability and improve user experience.
- Handled error management and API response validation, ensuring smooth and reliable interactions.
- Optimized performance by implementing lazy loading, reducing bundle size, and enhancing rendering efficiency.

Autopedia | Tech Oceanic Technologies

November 2023 – January 2025

Developed a web-based platform for automotive enthusiasts, featuring car comparisons, reviews, and user-generated content.

Responsibilities:

- Built and maintained a responsive MERN stack application with optimized performance.
- Created interactive UI components in React and managed state with Redux.
- Integrated APIs to display car data and implemented JWT-based secure authentication.
- Used virtualization to efficiently render large datasets, ensuring smooth performance in car comparison lists.
- Designed and implemented robust RESTful APIs in Node.js and Express.js for seamless data retrieval and management.

Suburban Jungle Inc. | Tech Oceanic Technologies

December 2022 – October 2023

Built a real estate platform to help users explore suburban neighborhoods, discover housing options, and home-search experience.

Responsibilities:

- Designed responsive interfaces with React and TypeScript for seamless user experience.
- Developed interactive features like virtual tours and neighborhood assessments.
- Managed complex state using Redux and integrated APIs for dynamic property data such as neighborhood info and property details.
- Implemented client-side form validation with custom error handling and user-friendly feedback.
- Utilized techniques like lazy loading and code splitting for fast load times and better performance.
