Portfolio

Noida

Software Engineer

Results-driven Software Engineer with **2.1 years of experience** in designing, building, and deploying **scalable full-stack applications**. Proficient in **React.js, Next.js, Node.js, PostgreSQL**, and **cloud-ready architectures**. Skilled in **agile methodologies, API integration, performance optimization**, and **delivering responsive, high-impact digital solutions**. Proven ability to **collaborate cross-functionally** and **deliver clean, maintainable code** in **fast-paced environments**.

PROFILE SUMMARY

- Full-Stack Engineering:** Specializing in **high-performance, scalable apps** using **Next.js, React.js, Node.js, and Express**, with strong foundations in **programming** and **web technologies**.
- REST API Architecture:** Experienced in building **secure, versioned, JWT-authenticated APIs, microservices**, and **backend services** aligned with modern **software development** practices.
- Agile Workflow & Collaboration:** Strong background in **SCRUM, sprint planning, Git workflows**, and **Jira-based project tracking**.
- Testing & Code Quality:** Proficient in **manual testing, Postman API validation**, and writing **unit-tested, production-grade code** with **solid debugging skills**.
- UI/UX Engineering:** Expert in **Tailwind CSS, ShadCN**, and **responsive design strategies** to enhance **user engagement** and usability.

CORE COMPETENCIES

- Backend Development
- Frontend Development
- Full Stack Development
- RESTful APIs
- Agile Methodologies
- Version Control (Git)
- Performance Optimization
- Responsive UI Development
- System Design
- Jira
- Manual Testing
- API Integration

IT SKILLS

- JavaScript
- TypeScript
- React.js
- Next.js
- Node.js
- Core Java
- ShadCN
- Express.js
- Redux
- PostgreSQL
- MongoDB (Mongoose)
- Postman
- GitHub
- Nodemailer
- VS Code
- IntelliJ IDEA
- XAMPP
- JWT
- JSON
- HTML5
- CSS3

WORK EXPERIENCE

Digital Tech Solution, Noida, india

May 2024 - Present

Software Engineer

Projects:

Project: Biz Accelerator

Description: SaaS-based enterprise solution for automating business workflows across multiple platforms.

Responsibilities:

- Developed and optimized reusable front-end components using Next.js and React Native, improving rendering efficiency and reducing **load times by 30%**.
- Built and integrated secure, scalable **REST APIs** with **Node.js** and Express, enabling real-time data flow and robust client-server communication.
- Implemented **Redux** for advanced state management and collaborated with cross-functional teams to deliver responsive, cross-platform UIs with enhanced performance.

Project: AmeyaProtracker (Taskify)

Description: Agile task tracking and project planning tool aimed at boosting team efficiency.

Responsibilities:

- Led development of the **attendance management system** (punch-in/punch-out), implementing real-time logging, timezone handling, and session tracking using Next.js, Node.js, and MongoDB.
- Built secure REST APIs and server-side logic for attendance data, ensuring accurate recordkeeping and seamless integration with task workflows.
- Developed responsive UI components with Tailwind CSS and ShadCN, and contributed to sprint planning and testing with over **90% integration** test coverage.

Assistant Software Engineer

Projects:**Project: Confidential Enterprise Web Application**

Description: Architected and developed a high-throughput, secure full-stack solution for enterprise-scale user engagement and workflow automation.

Responsibilities:

- Engineered modular, **reusable UI** components with Next.js and React, optimizing client-side rendering and SSR (Server-Side Rendering) for enhanced performance and SEO.
- Developed and secured RESTful APIs using Node.js and Express, implementing **JWT authentication**, and robust session management to enforce granular access control.
- Ensured software quality through manual testing, maintained code standards with **ESLint**, and led peer code reviews to deliver consistent, reliable features.

Project: CMS Platform

Description: Built a scalable Client Management System to streamline client data workflows and enforce secure access controls.

Responsibilities:

- Developed RESTful APIs with Node.js and Express, implementing **role-based authentication** (RBAC) and data validation for secure client CRUD operations, automating onboarding and client data workflows to reduce **processing time by 40%**.
- Engineered responsive admin dashboards using React and Tailwind CSS for intuitive client profile management, real-time data synchronization, and seamless multi-role access management.
- Performed manual testing of individual modules and end-to-end testing after integration to ensure functional accuracy and smooth module interoperability, enhancing overall system reliability

Project: Samarth Inc. Website

Description: Revamped and optimized company website leveraging low-code platforms for faster delivery and enhanced user experience.

Responsibilities:

- Rebuilt critical web pages using **Zoho Creator's** low-code drag-and-drop interface combined with custom scripting to deliver tailored functionality, boosting website load speed by 35% and significantly enhancing user engagement and conversion rates.
- Enhanced site responsiveness and cross-device compatibility through advanced CSS media queries and component libraries implementation.
- Developed **animated effects** to elevate visual appeal and improve user interaction. Partnered with QA teams to ensure seamless, zero-downtime deployments, maintaining high availability and operational continuity.

EDUCATION**Master of Computer Applications (M.C.A)**

2021 - 2023

Veer Bahadur Singh Purvanchal University

Bachelor of Science (B.Sc)

2018 - 2021

Veer Bahadur Singh Purvanchal University

CERTIFICATIONS

Core Java Training – Internshala

PROJECTS**Portfolio****Link:** Check Out My Work

- Built a responsive personal portfolio using Next.js, React.js, and Tailwind CSS to showcase full-stack projects and technical skills. Integrated interactive UI elements to highlight project features and demonstrate strong UI/UX and frontend development capabilities.
- Continuously maintained and updated the portfolio to reflect evolving technologies and best practices.

E- Library Web Application

DEC 2022 - MARCH 2023

- Developed a student-focused E-Library system using HTML, CSS, PHP, and **MySQL**, hosted locally with **XAMPP**, to provide e-book access and a user **feedback mechanism**.

Connect Four Game

JUN 2023 - AUG 2023

- Developed a two-player Connect Four game using Core Java and **JavaFX** in IntelliJ IDEA, featuring dynamic grid rendering and interactive token placement. Implemented robust game logic for win-condition detection, turn management, and real-time UI updates.
- Demonstrated strong problem-solving and attention to detail in delivering a responsive, engaging gameplay experience.
