Work Experience

- Project Engineer - (FullStack Developer)**, Crio.do – Bangalore, India June 2024 - Present
- Engineered an interactive portfolio builder using React.js, Redux, and Tailwind Css, enabling users to efficiently create professional portfolios through a user-friendly, no-code interface.
 - Coded a feature-rich learning dashboard using React.js, Redux, and Tailwind Css, improving course engagement by 20%.
 - Designed REST APIs in Node.js to fetch course content, assessments, and user progress, **reducing API response time by 30%**.
 - Contributed to the creation of a secure Mentor Portal for accessing user workspaces and sprint data, enhancing access control and streamlining authentication processes.
- SDE Intern**, Zero65 Technologies – Remote Mar 2024 - May 2024
- Developed and optimized backend APIs using Node.js for a financial tracking application, improving data processing efficiency and enhancing the security of user transactions.
 - Built a responsive and intuitive user interface with React.js, leading to noticeably better user engagement across devices and longer session durations.

Skills & Technologies

Languages: C, C++, JavaScript (ES6+), TypeScript.

Libraries and Frameworks: HTML, CSS, SASS/SCSS, Tailwind CSS, Bootstrap, Redux, Redux Toolkit, React-Redux, MERN Stack (MongoDB, Express.js, React.js, Node.js), MongoDB Atlas, Material UI, Rest API.

Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP).

Tools and Platforms: Version Control (Git, GitHub, GitLab), Visual Studio Code, WordPress, Canva, Postman.

Projects

- SwiftCart**  
- Developed authentication, shopping cart, and checkout functionalities for QKart while implementing responsive design principles, resulting in a **20% increase** in mobile user engagement.
 - Refined search performance using debounce in React, minimizing API requests by **40%** and enhancing real-time filtering.
- BlogSphere** 
- Built a responsive blog application using the MERN stack, optimizing frontend performance and API handling to reduce load times by 40% and deliver a smoother, user-centric experience.
 - Integrated Multer for secure and efficient image uploads, supporting files up to 5MB, which increased user-generated content by **30%** and enhanced platform engagement.
 - Configured role-based access control (RBAC) system with clearly defined permissions for 2 user roles, including admins and author, which streamlined content management workflows and enhanced team collaboration.
- Geminix Ai**  
- Integrated React Router in an AI web application to implement seamless multi-page navigation, enhancing user experience and interface usability.
 - Implemented persistent state management using **localStorage** to maintain timestamped chat history, while designing a fully responsive, accessible UI with **dark mode** support to enhance user experience across devices.

Education

B.Tech - Information Technology GPA: 7.8/10
MMMUT, Gorakhpur Dec 2020 - Jun 2024

Achievements

- Technical Expert Award** Nov 2024
- Created and scaled 4 MERN stack projects in a month, enhancing performance by **25%** and scalability.
- Quality Expert Award** Feb 2025
- Awarded 'Quality Expert' for resolving **150+ complex** debugging issues using Chrome DevTools and Postman.
