Professional Summary

A detail-oriented Software Engineer with over 3 years of experience in designing and developing scalable microservices-based applications. Proficient in Java, Spring Boot, MySQL. Adept at optimizing database performance, implementing accessibility standards, and collaborating with cross-functional teams to deliver high-quality software solutions.

Core Competencies

- Java (Core & Advanced), Microservices Architecture
- Frameworks/Tools: Spring Boot, Redis, Kubernetes, Docker
- Database Optimization (MySQL), Data Modeling, SQL Queries, Redis (Cluster Setup And Optimization)
- Cloud And DevOps: CI/CD Pipelines (Jenkins), Container Orchestration with Kubernetes
- Accessibility Standards: WCAG Implementation
- Tools: Git, Jenkins, Postman, SVN
- Agile Methodologies And System Design

Education

Dr. A. P. J. Abdul Kalam Technical University, B.Tech. in Information Technology Aug 2016 – Sept 2020

- GPA: 7.8/10.0
- **Coursework:** Computer Architecture, Comparison of Learning Algorithms, Data Structure

Experience

Software Engineer, Tata Consultancy Services – Gurugram Jan 2022–Present

- Designed and deployed scalable microservices-based applications using Java 8 and Spring Boot.
- Integrated Redis for caching and optimized data retrieval processes to improve application performance by 25%
- Deployed and managed Kubernetes clusters for containerized applications, ensuring 99.9% system uptime.
- Built CI/CD pipelines using Jenkins to automate deployment workflows across multiple environments.
- Optimized database performance through advanced querying techniques in MySQL and implemented data modeling for efficient storage solutions.
- Collaborated with QA teams for rigorous testing and timely resolution of bugs

Projects

Report and Communication Solutions

- Implemented Redis-backed caching mechanisms to reduce report generation time by 40%.
- Managed On-Demand Report (ODR) databases using MySQL and Redis for seamless data retrieval.
- Automated deployment strategies for reporting services on Kubernetes clusters.
- Applied solid software design principles to develop robust, performant, and testable code.
- Environment: Java, Spring Boot, Redis, Kubernetes

Self Services Solution

- Designed and developed microservices-based applications using Java 8, Spring Boot, and Microservices architecture, adhering to best practices for scalability and maintainability.
- Collaboration with QA Teams to ensure thorough testing of Software Application and addressing any identified bugs or issues.
- Debug and resolve software defects and issues in a timely manner.
- Implemented Web Content Accessibility Guidelines (WCAG) to ensure Software solution are accessible to users with.
- Environment: Java, Spring Boot, Git, Jenkins, NVDA, Wave, AXE DevTools extension

Certifications

AWS – Associate Developer

Achievements

TCS hackathon Milestone Winner April 23

Beyond Performance Award Nov 24
