PROFESSIONAL SUMMARY

Motivated software engineer with 1+ years of experience in full-stack development using **React.js**, **Python**, **Django**, and **Node.js**.

EDUCATION

Master of Computer Application (<i>Vellore Institute of Technology</i>)	2022 – 2024 8.8 CGPA
Bachelor of Computer Application (<i>Ewing Christian College</i>)	2018 – 2021 66.4 %

SKILLS

Languages:	Java , Python , JavaScript , TypeScript, HTML5, CSS3.
Libraries/Frameworks:	jQuery, React.js , Django , Node.js, Express.js, Spring MVC, Hibernate.
Databases:	MySQL , MongoDB, Oracle.
Tools:	Git , AWS , Postman, Docker, VS Code, JIRA, Excel, cPanel
Concepts:	DSA , OOP , DBMS, Rest APIs, Problem Solving, SDLC, Agile.

WORK EXPERIENCE

Junior Software Engineer Link <i>KDS Services Pvt. Ltd.</i>	Feb, 2024 – May, 2025 <i>Lucknow, India</i>
- Developed and maintained web applications using React.js, Django, and Python. - Designed and optimized MySQL databases, ensuring efficient data retrieval and reducing query response times by 35%. - Built robust server-side logic with Django REST Framework, ensuring high performance and maintainability. - Integrated third-party APIs and internal services to enhance application functionality and user experience. - Diagnosed and resolved technical issues, reducing system downtime and improving performance consistency by 20%. - Actively participated in Agile ceremonies and collaborated with cross-functional teams to meet project deadlines. - Deployed applications on AWS EC2, managed static assets with S3, and implemented IAM roles for secure access control.	
Software Intern Link <i>SpanCoders</i>	Jan, 2022 – Jun, 2022 <i>Lucknow, India</i>
- Developed web applications using React.js, Java, and Spring Boot with efficient backend logic. - Created and documented RESTful APIs to improve cross-system communication. - Reduced bugs by 30% via extensive testing and code reviews. - Managed Oracle SQL databases with a focus on data integrity. - Authored technical documentation to support onboarding and maintenance.	

PROJECTS

Stock Prediction Portal Link
- Built a full-stack stock prediction app using React.js (frontend) and Django (backend) with LSTM (Keras) models. - Used yFinance for real-time stock data, NumPy, Pandas for data processing, and Matplotlib for trend visualization (100 & 200-day moving averages). - Handled input serialization, model inference, and dynamic result rendering using Axios, scikit-learn. - Implemented model evaluation metrics (MSE, RMSE) to assess prediction accuracy and retrain the model periodically. - Displayed forecast results as static line graphs using Matplotlib.
E-Commerce Web Application Link
- Built a complete e-commerce platform using React.js, Node.js, Express.js, and MongoDB. - Implemented JWT authentication and role-based access for Admin/User separation. - Developed a dashboard to manage users, products, and orders with dynamic filtering and search - Ensured responsive design using Material-UI and centralized state with Redux Toolkit.

CERTIFICATES

• AWS Cloud Practitioner Essentials Link	• The MERN Full-Stack Guide – Udemy Link	• Agile Methodology – Cognizant Link
---	---	---

ACHIEVEMENTS

• 100DaysOfCodingChallenge – VIT Bhopal Link	• 5-Star in Java & SQL – HackerRank Link	• Top 9% - Codekaze - Coding Ninjas Link
