Professional Experience

Webearn Solution Pvt. Ltd. - Noida, India

Lead Frontend Developer | Feb 2022 - Present

- Led frontend development for enterprise and e-commerce applications.
- Developed and maintained responsive UI components using HTML, CSS, Bootstrap, and JavaScript.
- Utilized Bootstrap's grid, Flexbox, and media queries to ensure mobile responsiveness.
- Handled AJAX requests and DOM manipulations for improved interactivity.
- Implemented asynchronous data loading to optimize performance and user experience.
- Worked closely with UI/UX teams to convert wireframes into pixel-perfect web interfaces.
- Ensured error handling, smooth API integration, and user-friendly loading states.

Key Projects

1. Project: HPI

Client: Harvard Pilgrim Health Care, USA | Team Size: 8 | Tech Stack: HTML, CSS, JavaScript, React

Description: Developed frontend modules for a self-funded health insurance management system. Built secure, responsive interfaces compliant with HIPAA standards. Integrated with third-party services to enhance claim processing and user experience.

2. Project: CartX

Client: Cart.com Inc, Houston, USA | Team Size: 8 | Tech Stack: HTML, CSS, JavaScript, jQuery

Description: Built frontend for an e-commerce platform providing end-to-end solutions including order fulfillment, warehousing, and last-mile delivery. Focused on creating scalable interfaces and smooth UX for business users.
