WORK EXPERIENCE

Software Developer

Next Big Technology Pvt Ltd, Jaipur

04/2024 - 03/2025

Achievements/Tasks

- Mzaady Web/App - Technology use - PHP with Laravel framework, MySQL, HTML, CSS, JavaScript, jQuery, and Postman for API development ,Mobile authentication using Firebase, cron jobs. In this project create web application and also create Api for app . singly handle the project. this project about to Auction where user create auction and another user bid for this project
- GuardStaffer Web - I was responsible for implementing the user registration functionality, including seamless integration with a third-party dashboard. Whenever a user registered on the website, their details were automatically sent and registered on the external system via API integration. This ensured real-time synchronization of user data between platforms, with secure handling, proper error logging, and robust communication between services
