PROFESSIONAL SUMMARY

Dynamic Full Stack Developer with expertise in the MERN stack and Python Flask, backed by practical experience. Skilled in building robust web applications and optimizing backend performance to enhance user experience. Strong problem-solving abilities and a passion for leveraging modern technologies to deliver innovative solutions. Committed to continuous learning and collaboration in agile environments to drive project success.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, GGSIPU

2020-2024

CGPA: 9.16

SKILLS

Technical Skills: Java, C/C++, JavaScript, Python (Flask), Express.js, Node.js, React.js, RESTful, Next.js, SQL, MongoDB, Docker, Git, AWS, Linux, Bash Commands, PostgreSQL,

Soft Skills: Leadership, Problem Solving, Teamwork, Time Management

EXPERIENCE

Software Engineer

Oct 2024-Present

SecureGen

Remote

- Led development and integration of **SONIC**, a high-performance cluster management platform for pharmacological data operations including visualization, manipulation, and quality analysis.
- Optimized data handling with MongoDB and Redis; implemented Celery to streamline asynchronous task execution.
- Deployed production-grade backend services using Gunicorn, improving system reliability and throughput.

Full stack Developer

Oct 2024-Jan 2025

StelloTech (**Part Time**)

Remote

- Designed and implemented a comprehensive **Inventory Management System**, handling both backend architecture and frontend interfaces to streamline company operations.
- Played a pivotal role in automating inventory workflows, reducing manual effort, and enhancing operational efficiency through a custom-built full-stack application.

IT developer

Mar 2024 -Aug 2024

To-Let Globe

Remote

- Application Programming Interface handling and property listings, along with backend integration with the frontend.
- Interact with MongoDB or SQL for database operations, ensuring proper error handling when posting blogs

PROJECTS

1. Chatter Sphere:

Integrated WebSocket for persistent connections, ensuring low-latency message delivery. Implemented user authentication and room-based chat functionality for personalized experiences. Optimized data handling for smooth, real-time chat even under high traffic.

Tools/Platform: React.js, JavaScript, Express.js, Socket.io, JWT, Node.js

2. Taste Track:

Developed a platform where users instantly discover diverse dishes, accessing complete ingredient lists and step-by-step preparation instructions. Utilized Foodan API for accuracy and seamless interaction.

Tools/Platforms: Express.js, JavaScript, jQuery, API, React.js, Node.js.

LEADERSHIP

Team head of my college's coding contest for three years, successfully managing the event, coordinating with participant.
