OBJECTIVE

Java Full Stack Developer with 1.8 years of experience in building scalable backend systems using Spring Boot and Microservices. Experienced in designing RESTful APIs, integrating databases, and developing interactive UI with Angular. Passionate about writing clean code, optimizing system performance, and delivering high-quality software solutions.

EDUCATION

Nandha Engineering College, Erode, Tamilnadu.

B.E – Electronics and Communication Engineering | Sep 2018 - July 2022 | CGPA: 8.8

SKILLS

Programming Languages: Java, Python, SQL

Backend Technologies: Spring Boot, Hibernate, RESTful APIs, Microservices (Spring Cloud)

Frontend Technologies: Angular JS, React JS, JavaScript, HTML, CSS, Bootstrap, Typescript, AJAX

Databases: MySQL

Version Control & CI/CD: Git, GitHub

Tools & Platforms: Eclipse, Postman, VS Code, Git, Docker, Jenkins, Node Js

Cloud & DevOps: AWS, CI/CD Pipelines

Testing Frameworks: JUnit, Selenium, TestNG

EXPERIENCE

Associate Software Engineer

Nov 2023 - Present

Mphasis

Bangalore, IN

- **Developed and optimized backend services** using Java, Spring Boot, ensuring high performance and scalability.
- Designed and implemented **10+ RESTful APIs**, reducing data retrieval time by **25%** and improving user experience.
- Collaborated with **cross-functional** teams to gather requirements and enhance **UI/UX with Angular**.
- Integrated **MySQL database** for efficient data storage and retrieval, improving query response time by **30%**.
- Conducted unit testing with **JUnit and TestNG**, achieving a 95% test coverage for **backend services**.

PROJECTS

Project 1 : Client: Boden - E-commerce Platform |

Jan 2024 - Present

- **Developed & optimized** Developed scalable backend services using Java, Spring Boot, and REST APIs. Developed scalable backend services using Java, Spring Boot, and REST APIs and performance by **30%**.
- Created responsive front-end interfaces using HTML, CSS, JavaScript, and ReactJS
- **Integrated APIs** with the Integrated AJAX and jQuery for real-time dynamic web updates
- **Optimized & Used** Hibernate and MySQL for database design and efficient data access to reducing page load time by **40%** and improving responsiveness.
- **Collaborated in Agile teams** to deliver **feature enhancements** for freight management.

Project 2 : Client: Pinnacle Health Insurance - Insurance Management System |

Nov 2023 - Dec 2024

- Designed and developed **RESTful APIs** to built secure microservices using Spring Boot, Spring Security, and Docker..
- Deployed applications on AWS (EC2, S3, RDS) for scalability and storage.
- Integrated **MySQL database with Hibernate** to store and developed modular ReactJS components for UI development.
- Automated complaint resolution workflow, **reducing resolution time** from 3 days to 2 days, increasing efficiency by **25%**.
- Conducted **unit testing with JUnit** and functional testing with Postman to validate **backend logic and endpoints**

EXTRA-CURRICULAR ACTIVITIES

- **Open-Source Contributions:** Actively contribute to GitHub projects related to Java and Spring Boot.
- **Coding Competitions :** Participated in competitive programming events like geeks for geeks, Hackathon.
