EXPERIENCE

SnDigitech Pvt Ltd.

Noida, India

MERN Stack Developer

20/04/2025 – Present

- Built the BDRL Truck-Partner Admin Panel with React.js & Tailwind CSS for end-to-end vendor and client management.
- Integrated the React frontend with Node.js/Express RESTful APIs and MongoDB to handle partner onboarding, approvals and data flows.
- Developed dynamic pricing and cost-analysis dashboards to help admins optimize operational costs and drive higher profit margins.

SnDigitech Pvt Ltd.

Noida, India

MERN Stack Intern

20/01/2025 – 20/04/2025

- Architected and built three full-stack applications (Task Management App, ELTutor, BDRL) using React.js, Node.js, Express and MongoDB, incorporating JWT-based authentication and role-based access control.
- Designed RESTful APIs to power CRUD operations and integrated real-time features (Socket.IO for Task updates in Chat).
- Deployed front-end and backend to AWS EC2/S3; optimized performance to cut load times by ~30% and achieved 99.9% uptime.

SKILLS

- **Technical:** HTML, CSS, javascript, React.js, Node.js, Express.js, MERN Stack, C++, Java, sql, NoSql, MongoDB
- **Tools:** AWS (S3, EC2), Vscode, Excel, Vercel

PROJECTS

Task Management App

01/25– 02/25

- Architected and developed a full-stack task management tool using React.js, Node.js, Express, and MongoDB
 - Built user authentication (JWT) and role-based access control to secure project data
 - Implemented Chat application with real-time updates in Tasks via Socket.IO, boosting team productivity by ~20%
- Live Project link - <https://main.d2gt0furthnnb6.amplifyapp.com/>

ELTutor Admin Panel

02/25– 03/25

- Integrated React-based front-end with Node.js/Express RESTful APIs to manage authentication, session scheduling and payments—reduced data errors by ~25%.
 - Designed and built a responsive, Material-UI driven UI for both tutor and student portals, ensuring a seamless experience across devices.
 - Implemented Chat application with real-time updates in Tasks via Socket.IO, boosting team productivity by ~20%
- Live Project link - <https://panel.eltutor.in/>

BDRL Truck-Partner Admin Panel

03/25 – Present

- Built the BDRL Truck-Partner Admin Panel to enable end-to-end vendor and client management—onboard, approve, and monitor partners through an intuitive React.js interface.
 - Integrated dynamic pricing and cost-analysis dashboards, empowering admins to reduce operational costs by ~25% and boost profit margins by ~15%.
 - Architected scalable data workflows (Node.js/Express + MongoDB) to support rapid partner growth—cut vendor onboarding time by 40% and accelerated client scaling by 50%.
- Live Project link - <https://bdrl.co.in/>

EDUCATION - Master's of Computer Applications (Lovely Professional University)

Jalandhar, India, 2022 – 2024
