Work Experience

Inferlytix

June 2023 - Present

Junior Full stack Developer

Delhi, India

MAPLE APP (Medication Management Dashboard):

- Developed Maple App, a medication management dashboard platform, from scratch to help users create and manage medication and track reminders seamlessly,
- Enabled business users to track medications and conduct experience-based surveys for better healthcare insights,
- Tackled the challenge of utilizing large-scale data to drive data-informed decision making across the platform,
- Collaborated with designers to translate UI/UX mock-ups into functional frontend components,
- Built and maintained the application using **Next.js, Redux, JavaScript, HTML, and CSS**,
- Responsible for developing and maintaining tools to support application updates and feature enhancements.

STOCK JARVIS (Trading Platform):

- Developed Stock Jarvis, a trading platform enabling real-time simulation for price action and chart-based traders,
- Designed and implemented features for buying/selling instruments within a realistic trading environment,
- Built a simulator that uses historical market data to replicate live trading scenarios with granular and accurate details,
- Utilized **React.js, TypeScript, Node.js, Express.js, Ant Design (ANTD), HTML, CSS, PostgreSQL, RESTful APIs and Postman**, to build interactive UI components.

EXPERT IQ (B2B Application):

- Developed Expert IQ, a B2B application designed to build a community among top-level personnel,
- Enabled organizations to filter and access lists of currently employed individuals based on specific criteria,
- Utilized **React.js, Material UI, MongoDB, Express.js, Node.js, Mongoose, RESTful APIs, Typescript, RTK, Figma and Swagger**,
- Contributed to enhancing employee discovery and organizational networking through a dynamic and responsive UI.

Education

Panipat Institute of Engineering and Technology

Haryana, India

Bachelor of Technology, Mechanical Engineering

2013-2016

Vaish Technical Institute

Haryana, India

Polytechnic Diploma, Mechanical Engineering

2010-2013

Skills

- **Web Technologies:** HTML, CSS, JavaScript, Typescript, DOM, XML, AJAX, JSON,
- **Frameworks:** ReactJS, NextJS, TypeScript, NodeJS, ExpressJS,
- **Databases:** SQL, PostgreSQL, MongoDB,
- **CSS Frameworks:** Bootstrap, Material UI, ANTD,
- **Project Tools:** NPM, Babel, Webpack, ESLint, React Testing Library,
- **Version Control:** Git, GitHub, Bitbucket,
- **Other Tools:** JIRA, ServiceNow, MS Excel,
- **Additional Skills:** Responsive Design, Cross-Browser Compatibility, Web Performance Optimization,
- **Domain:** Life Sciences.

Projects

- **EV charging App ([Link](#)) :-**
 - Created an EV charging station app that assists the users to track down the nearest charging station in the map. Implemented CRUD operations on UI to update or delete a charging stations.
Tech-Stack: Vue.js, MongoDB, Express.js, Node.js, RESTful APIs, Postman, JWT, Leaflet, Render.
- **Hotel Platform App ([Link](#)) :-**
 - Made a Hotel Booking and Recommendation Platform App to visit, draft booking, booking and recommend hotel bookings.
Tech-Stack: MongoDB, React.js, HTML, CSS, JavaScript, Express.js, Node.js, RESTful APIs, Postman, PostgreSQL.
- **Dummy JSON Data ([Link](#)) :-**
 - Created an app which could fetch dummy JSON data in detailed format.
Tech-Stack: Nuxt.js, HTML, CSS, JavaScript, TailwindCSS.

Certifications

- MERN Stack (DUCAT)
