Experience

GeeksforGeeks

April 2024 – Present

Software Developer

Noida, UP

- Led **UI revamp** of Write Portal using **React.js**, **SCSS**, and **Tailwind CSS**, improving **responsiveness** by **20%**, reducing styling redundancy by **12%**, and reducing **FCP** by **25%** through optimized CSS loading and critical render path.
- Developed **4 dashboards** with **React.js** for monitoring **5000+ weekly articles**, boosting team productivity by **25%**, while optimizing **LCP** by **30%** through code-splitting and lazy loading components.
- Optimized **frontend state management** with **Redux/RTK Query**, reducing **API calls** by **30%**, improving **FCP** and **LCP** by **20%** with reduced JavaScript payload size and faster data fetching.
- Integrated **ChatGPT OPEN API**, automating **2000+ post summaries**, cutting manual processing time by **80%**, while optimizing **FCP** by reducing backend response times and enhancing client-side rendering speed.
- Revamped **Courses and Batch Track pages** with **React.js**, reducing **load time** by **30%**, improving **LCP** by **15%**, and enhancing user engagement through lazy-loaded images and optimized assets.

GeeksforGeeks

January 2024 – March 2024

Member of Technical Staff Intern

Noida, UP

- Built and integrated **6+ internal dashboards** using **React.js** and **RTK Query** to monitor **1K+ monthly transactions**, boosting data visibility and improving fetch speed by **20%**.
- Optimized **Node.js + Express backend** for editorial tools, reducing query execution time by **8%** across **10K+ monthly records** and enhancing backend throughput.
- Developed secure backend endpoints using **Node.js + Express** for editorial tracking workflows, implementing permission validations to improve audit compliance and backend reliability.

Juno Software System Pvt. Ltd.

August 2022 – January 2023

SDET Intern

Pune, Remote

- Revamped **front-end** of company's ERP software utilizing **React**, resulting in a **40%** decrease in page load times and a **30%** increase in daily active users
- Worked with Testing & Implementation teams to improve **UI/UX**, reducing issues by **20%** and resolving **50+** critical bugs, enhancing platform stability user satisfaction.

Projects

Mobix (Full-Stack App) | Live | React.js, Node.js, MongoDB, Socket.io, Google Maps API, JWT

December 2024

- Built a scalable ride-sharing app with **JWT authentication**, **Socket.io** for real-time updates, and **Google Maps API** for route tracking. Developed **RESTful backend** with **Node.js** and **Express.js**, integrating **MongoDB** for efficient data management.

Shoppie E-commerce Website | Live | React.js, Axios, Bootstrap, Context API, Node.js, MongoDB

December 2024

- Developed a full-stack e-commerce platform with a **Node.js** backend, integrating **MongoDB** for product catalog and **JWT** for secure authentication. Optimized front-end state management using **Context API** and **Axios**.

Personal Portfolio Website | Live | Next.js, React.js, TypeScript, Tailwind CSS, Framer Motion, GSAP

December 2024

- Built a responsive portfolio with **Next.js** for static site generation and server-side rendering, achieving **90+ Lighthouse score**, with secure **API routes** for form handling.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, C++, Python

Backend Technologies: Node.js, Express.js, Django REST Framework, REST APIs, WebSocket, JWT

Frontend Technologies: React.js, Next.js, Tailwind CSS, Bootstrap

Databases: MongoDB, MySQL

Dev Tools: Git, Postman, Bitbucket, Docker (basic), AWS

Concepts: API Design, System Design-LLD, CI/CD

Other Skills: Agile Scrum Methodology, Data Structures Algorithms

Achievements

- LeetCode: Rated **1499**, ranked in the top **44.28%** globally.
- HackerRank: Earned a **4-star rating** in **JavaScript**.

Education

Kurukshetra University

August 2021 – May 2023

Master of Science in Computer Science

8.32 CGPA
