HERITAGE

Built to Explore What Others Overlooked

Dook's earliest strength was identifying destinations that were not yet part of the mainstream Indian outbound conversation — and building the products, relationships, and operations to serve them well.

- **Emerging Destinations**

Developed markets across Central Asia and the Caucasus before they were established outbound circuits.

- **Less Conventional Circuits**

Built fixed departures and group products to destinations most competitors weren't yet serving.

- **New Products for Indian Travellers**

Designed FIT, group and MICE products tailored to the Indian outbound traveller.

- **Entrepreneurial Operations**

Grew local supplier relationships and on-ground capability alongside every new market entry.

The EaseMyTrip Advantage

In 2023, Dook joined the EaseMyTrip ecosystem — a strategic milestone that paired Dook's destination expertise and operational DNA with the scale, technology, and distribution strength of one of India's leading travel platforms.

- **Competitive Contracting** Negotiated rates reflect long-term supplier relationships and established market position.
- **Customised Solutions** Itineraries and commercial terms tailored to each partner's traveller profile and volume.
